

## CPD Course: Environmental Sustainability Skills for the Workforce

As part of the NHS North East London Integrated Care System environmental sustainability and net zero journey we are offering all staff a certified continuing professional development (CPD) course on Environmental Sustainability Skills for the Workforce (ESSW). This is a comprehensive one-day environmental awareness and sustainability skills training course aimed at non-environmental specialist delivered by teams from Barking, Havering, and Redbridge University Hospitals NHS Trust (BHRUT) and Barts Health NHS Trust (Barts Health) and NHS North East London.

The ESSW course is designed and certified by the Institute of Environmental Management and Assessment (IEMA) to equip learners with practical introduction to environmental sustainability so that they are equipped with the knowledge, understanding and motivation to make positive contributions towards addressing the current environmental emergencies.

The full day sessions are delivered online via MS Teams, on the following dates:

**Day & Date**, 09:00 to 17:00 Hours (7 hours)

- Tuesday 25 June
- Wednesday 10 July
- Thursday 26 September
- Thursday 14 November

**Tutors:** Dr Philip Tamuno FIEMA & CEnv (Joint Head of Net Zero and Sustainability) supported by Rebecca Waters AIEMA (Health Improvement and Inclusion Manager) and Samuel Wood AIEMA (Sustainable Travel Officer)

### Key Features of the Course

- No prior environmental knowledge required – this open to all staff from any health and care profession
- Digital workbook supplied for learners to keep
- Practical activities and workshops throughout the session
- At the end of the course, an accredited IEMA certificate is awarded to all those that attain a minimum score of 70% in the online multiple-choice assessment.

### Learning Outcomes

On successful completion of this course learners will have knowledge and understanding of:

- the main environmental and economic risks and opportunities
- compliance obligations and business drivers for change
- the main potential impacts on environment and sustainability
- how to improve environmental performance.
