

Greening the Aberfeldy Practice

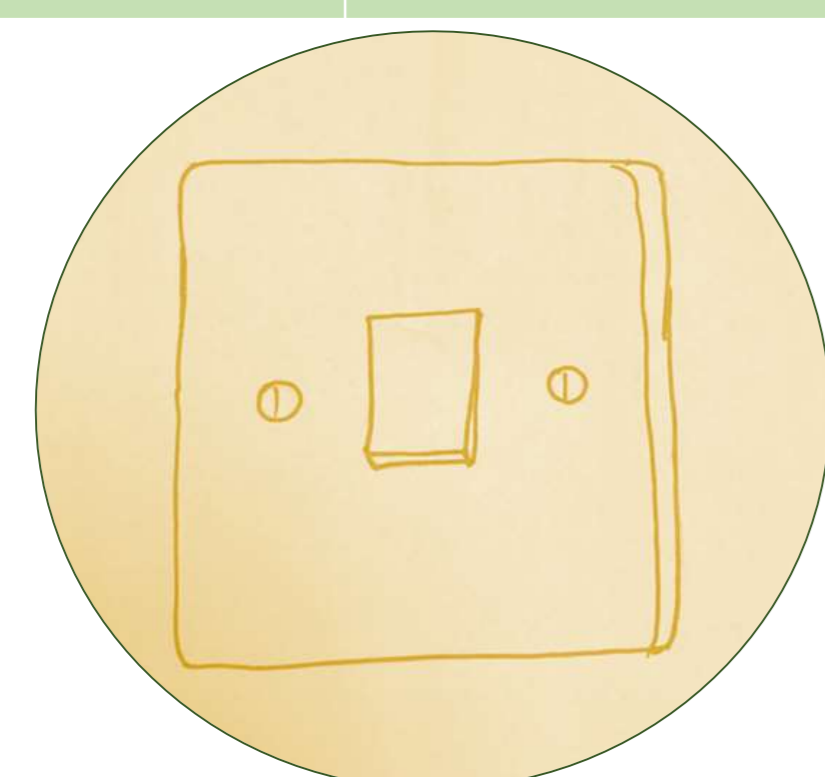

Culture

Inhalers

Staff transport

2018	2023
1 cyclist	7 cyclists 2 EVs

Energy and waste

Almost paper free

Adopted reusable face masks

Switch off policy

Marked gas and electricity use reduction from 2021-2022

Non clinical carbon footprint calculated 2021 and 2022

**We are an inner city practice in East London
We have embedded sustainability into the culture of our practice**

We have not always had the tools that we need and we do not claim to have done things perfectly. However, we have been vocal in making the case for change

We declared a climate emergency in 2020

Staff are fully aware and engaged. All staff had made changes at home or at work according to a staff survey

We are: a Fairtrade organisation, a London living wage employer, an NHS Forest, a Safe Surgery and a parkrun Practice

We have been advocates for clean air and we are currently knitting air quality data**

www.aberfeldypractice.nhs.uk

Feb 2019*

68% MDIs

24kgCO2e average salbutamol inhaler

63% SABA (cf. ICS)

Now

50% MDIs

11.8kgCO2e average salbutamol inhaler

48% SABA (cf. ICS)

Achievements

2020

Bronze Green Impact for Health Toolkit***

2023

Gold (pending audit) Green Impact for Health toolkit
