

Air Pollution & You

NHS

TOWER HAMLETS
TOGETHER

Air pollution can worsen asthma symptoms including coughing, wheezing and breathlessness. The actions below can help:

Discover the side streets

Use quieter roads and paths to keep away from heavy polluting traffic.

Leave the car behind

Encourage your whole family to walk, cycle and scoot more - air pollution can be higher inside a car than outside.

Check the pollution forecast

Sign up at [AirText.info](https://www.airtext.info) to get air pollution alerts sent to your phone.

Turn the engine off

If you do need to use a car, ask the driver to turn the engine off when the car isn't moving.

Keep the air clean inside too

Use fragrance free and low-chemical cleaning products. Stop air pollution collecting in your home by using extractor fans and opening windows away from busy roads.
