Introduction to London NHS App Refresher Session

NHSE London Digital Transformation (Primary
Care)

This webinar is being recorded
and will be shared

Housekeeping

This session will be recorded, and the slides will be shared

Links to resources will be included in the slide deck

Q&A function is available – please use it to ask questions at any time

NHSE colleagues are in the chat and will endeavour to answer as many questions as they can. Any that need to be taken away will be circulated at a later date.

Introduction to the session

- Aim is to help improve knowledge and confidence in using, promoting, and supporting patients with the NHS App
- Today's session revisits the basics of what the NHS App does, how you and your patients can benefit from digital, and how to integrate the NHS App into your day-to-day services
- Ambition for the NHS App to be the digital front door to the NHS, enabling access, improving outcomes and efficiency of services
- Access to general practice continues to be high priority, with improved patient experience also set out in the [Operating and Planning guidance](#) for 25/26 including:
 - ✓ Providing more choice to patients by making 70% of elective care appointments available to view and manage in the NHS App
 - ✓ Ensure your GP clinical systems are configured correctly, allowing access to all core features e.g. appointment and prescription management, health record views and notifications and messaging
 - ✓ Prioritising and proactively using NHS App-first communications

NHS App Promotion across London

NWL ICB

- Postcard drop
- Paid social media campaign
- Multi-lingual posters & business cards
- Flyers for patients with learning disabilities
- Patient-forum demos
- Primary care webinars to practices
- In-person training for practice staff

NEL ICB

- Patient-facing events
- Web portal with resources
- Wider ICB 'Finding the Right Care' campaign
- Pharmacy outreach
- Targeted SMS campaigns
- Mapping out digital inclusion hubs
- Practice website audit

NCL ICB

- Social media managed service
- NHS App Ambassador recruitment and training
- Promoting EMIS configuration for record access
- 'Discovery calls' with practices
- Updating NHS App content on ICB website
- Promoting the NHS App with PCNs and local colleagues

SEL ICB

- Flyers in IMD3 locations
- Spotify ads
- Social media & Google Search/Display campaign
- Working with Good Things Foundation (data, devices and signposting to hubs)
- Bus stop and bus back ads
- Patient engagement events
- NHS App Awareness week
- SMS campaigns
- Signposting to the NHS App from GP surgery WiFi page

SWL ICB

- Social media & Google Search SEO campaign
- Awareness baseline survey
- Technical webinars with practices
- Localised flyers
- Street ambassadors
- Patients and staff videos
- Bus stop ads
- Providing free SIM cards to eligible patients

What are we doing regionally?

Using dashboard data to inform which areas require targeted support to encourage usage of features such as: repeat prescription ordering, switch-on of notifications and appointments booked

Communications and marketing activity to promote NHS App functionality:

- NHS App guidance pack for GP surgery staff
- Developed stakeholder toolkit and materials including postal leaflets, business cards and multilingual posters
- Webinars and sharing learning

Working closely with the NHS App team and suppliers to combat issues / gaps in functionality:

- Escalate issues raised by ICBs and local colleagues to relevant workstream leads
- Contribute to user research and improvements to patient journeys within the App
- Requirements gathering to feed into NHS App dashboard improvements
- Integration with SMS suppliers, e.g. increase fallback time and expansion to all types of messages
- Integration with OC suppliers

Quiz

The NHS App

Helping people to get well, stay well and manage their health and care

Owned and run by the NHS, the NHS App enables people to access digital health and care services

- Free to download
- available to anyone 13 years and over
- registered with an NHS GP practice in England or the Isle of Man

Download the NHS App for yourself: nhs.uk/nhs-app/

Mobile phone and device compatibility

What software version is required to the NHS App?

For the best user experience, mobile and tablet devices require minimum software versions.

- **Android:** version 8 (Oreo) and above, with devices that have a front facing camera
- **Apple iOS:** version 15 and above

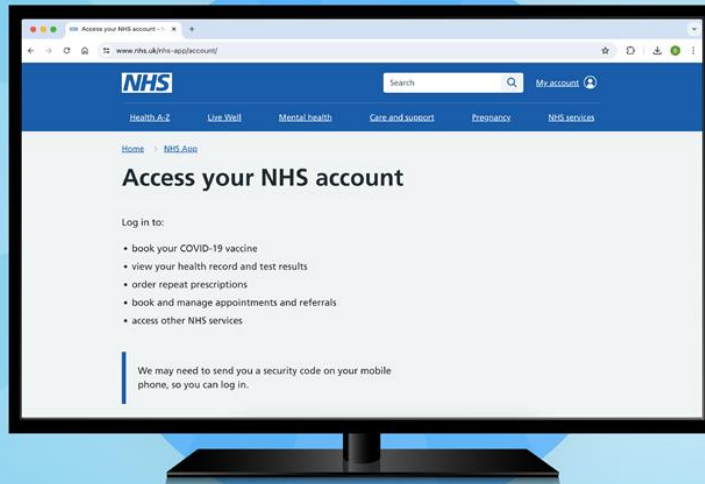

Some earlier versions still allow users to access the NHS App but we're no longer able to provide technical support to these versions, including:

- ***Android versions 6 and 7,***
- ***Apple iOS versions 9 and 10.***

For patients and users without a mobile phone or device, or one that doesn't meet the above requirement, the NHS App is now available via the [nhs.uk](https://www.nhs.uk) website

NHS Account

Log in to your NHS account online

www.nhs.uk/nhs-app/account

-  Order repeat prescriptions
-  See your health information
-  Access health advice
-  And much more...

Download on the

GET IT ON

What can the NHS App do?

*Remember the NHS App mirrors what is in your GP system

Get Well

- Find NHS services
- Use NHS 111 online
- Book GP appointments
- Manage secondary care appointments
- Contact your GP using an online form
- Search Health A-Z

Stay Well

- View your prescription details
- Order repeat prescriptions
- Book a COVID or flu vaccination
- Receive messages from your GP and healthcare providers

Manage Your Health

- View your health record
- View test results
- Nominate a pharmacy
- View your NHS number
- Register for a GP
- Make an organ donation decision
- Link account

*some features are only available if they have been enabled by your local healthcare provider

NHS App in Numbers

75% of adults in England signed up

Monthly Averages (July to September 2024)

4.4 million repeat prescriptions ordered

16.8 million GP record views

17.7 million messages sent

41 million monthly logins

Some benefits

Fewer calls to GP practice for test results

Ordering repeat prescriptions on the App is expected to save 1.85 million hours of GP practice time in 2024

There have been over 16.8 million barcode views since the national digital prescriptions roll out in Jan 2024, saving 500,000 hours of frontline staff time

During 2023/24, 22.5 million messages were sent through the NHS App, saving the NHS £1.1 million

Patient and user feedback

“I am a deaf BSL user, and this means I’m not able to call my GP directly the NHS App helps to improve my access to my own health information and medication”

Paul, NHS App user

“Being able to view my GP health record has made it easier for me to understand and manage my condition”

Greta, NHS App user

“I can check my health history, view test results and order repeat prescriptions via the NHS App. It’s very intuitive to use and useful to access a summary of my care”

Stephen, NHS App user

“It makes me feel like I’m being listened to, in simple terms it’s better communication.”

Gaynor, NHS App user

★★★★★ 20 May 2024

I find the app very useful. Being able to order repeat prescriptions and check on forthcoming appointments is what I want it to do, and it works well. There are things it won't let me do such as book doctor's appointments, but that is limited by the surgery and not by the app.

★★★★★ 15 April 2024

Always been very helpful, especially when re-ordering my prescription.

★★★★★ 10 May 2024

Good service and reliable. Very convenient and user friendly.

★★★★★ 4 April 2024

Perfect app for managing everything to do with my health centre from appointments to prescriptions and more.

★★★★★ 7 April 2024

I order monthly medication through the app and find it easy to use and reliable. Thank you

See more about how the NHS App helps people manage their health: [Patient Case Studies](#)

Menti.com - use code 1978 2671

NHS login

Proving your identity to access the
NHS App

NHS login

All users are required to verify their identify to access the full range of NHS App functionality.

NHS login provides people with a simple, single way to securely access the NHS App and multiple other digital health and social care services.

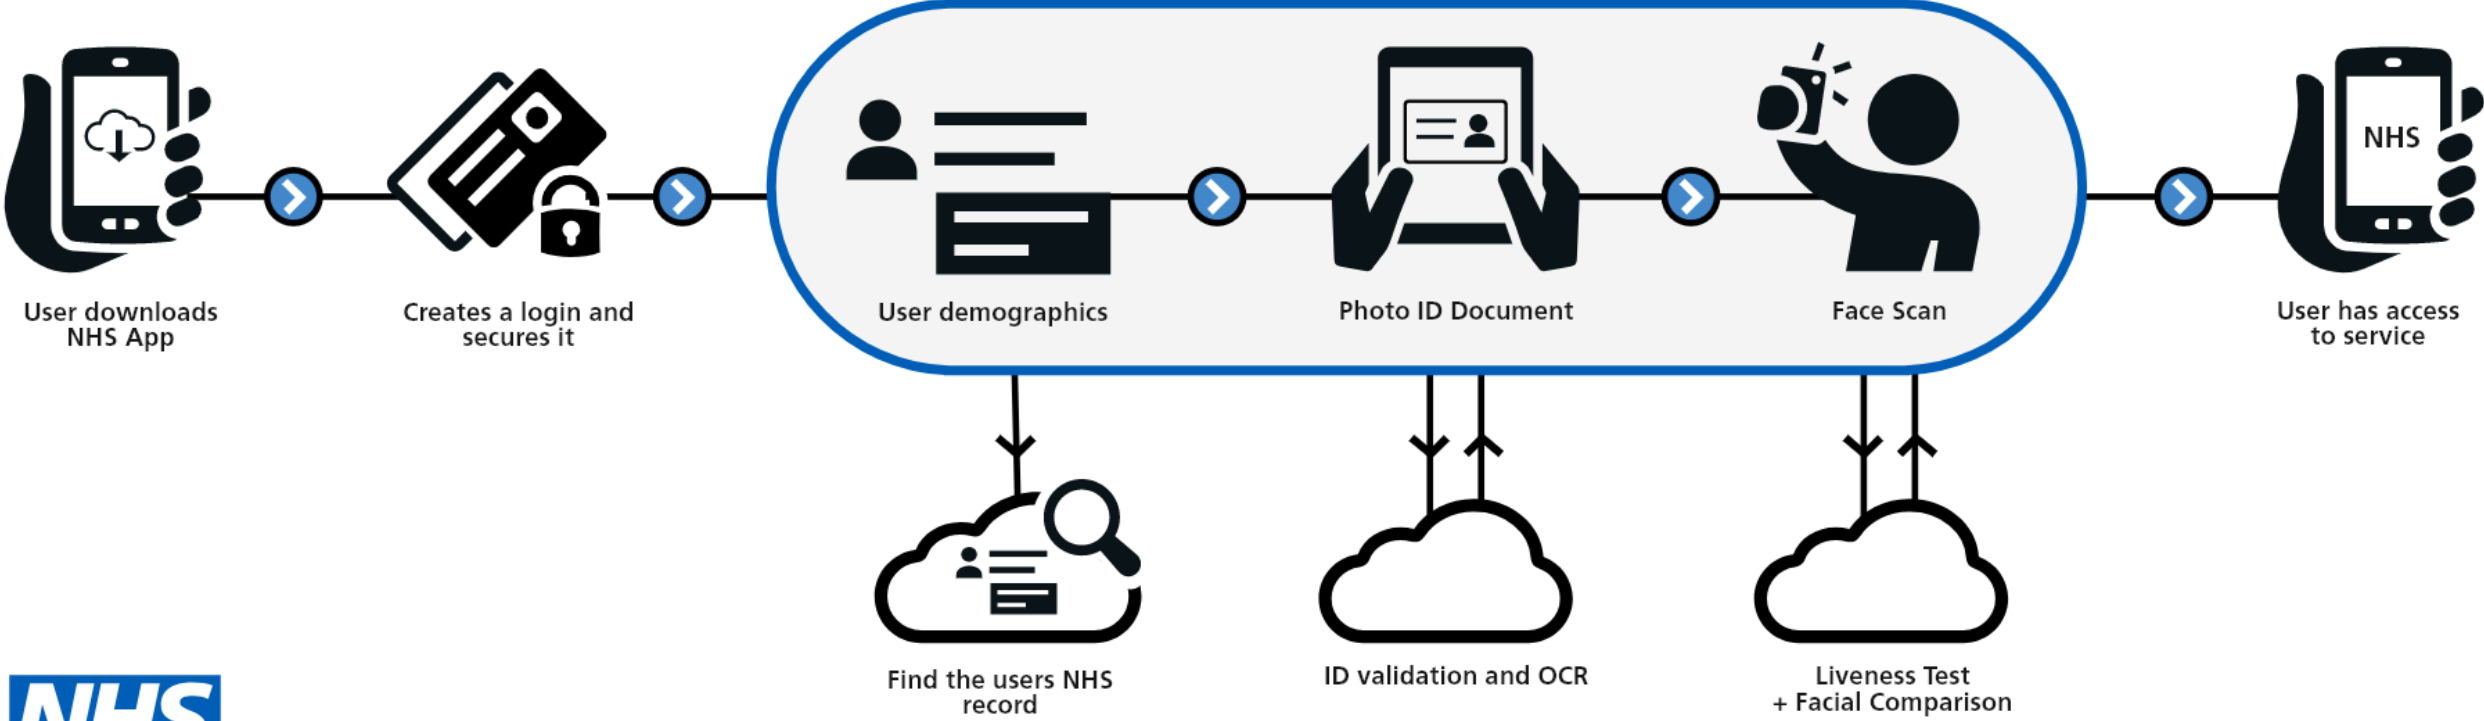

Most people will be able to register and verify their ID without the need to come in to practice

ID is verified by NHS England

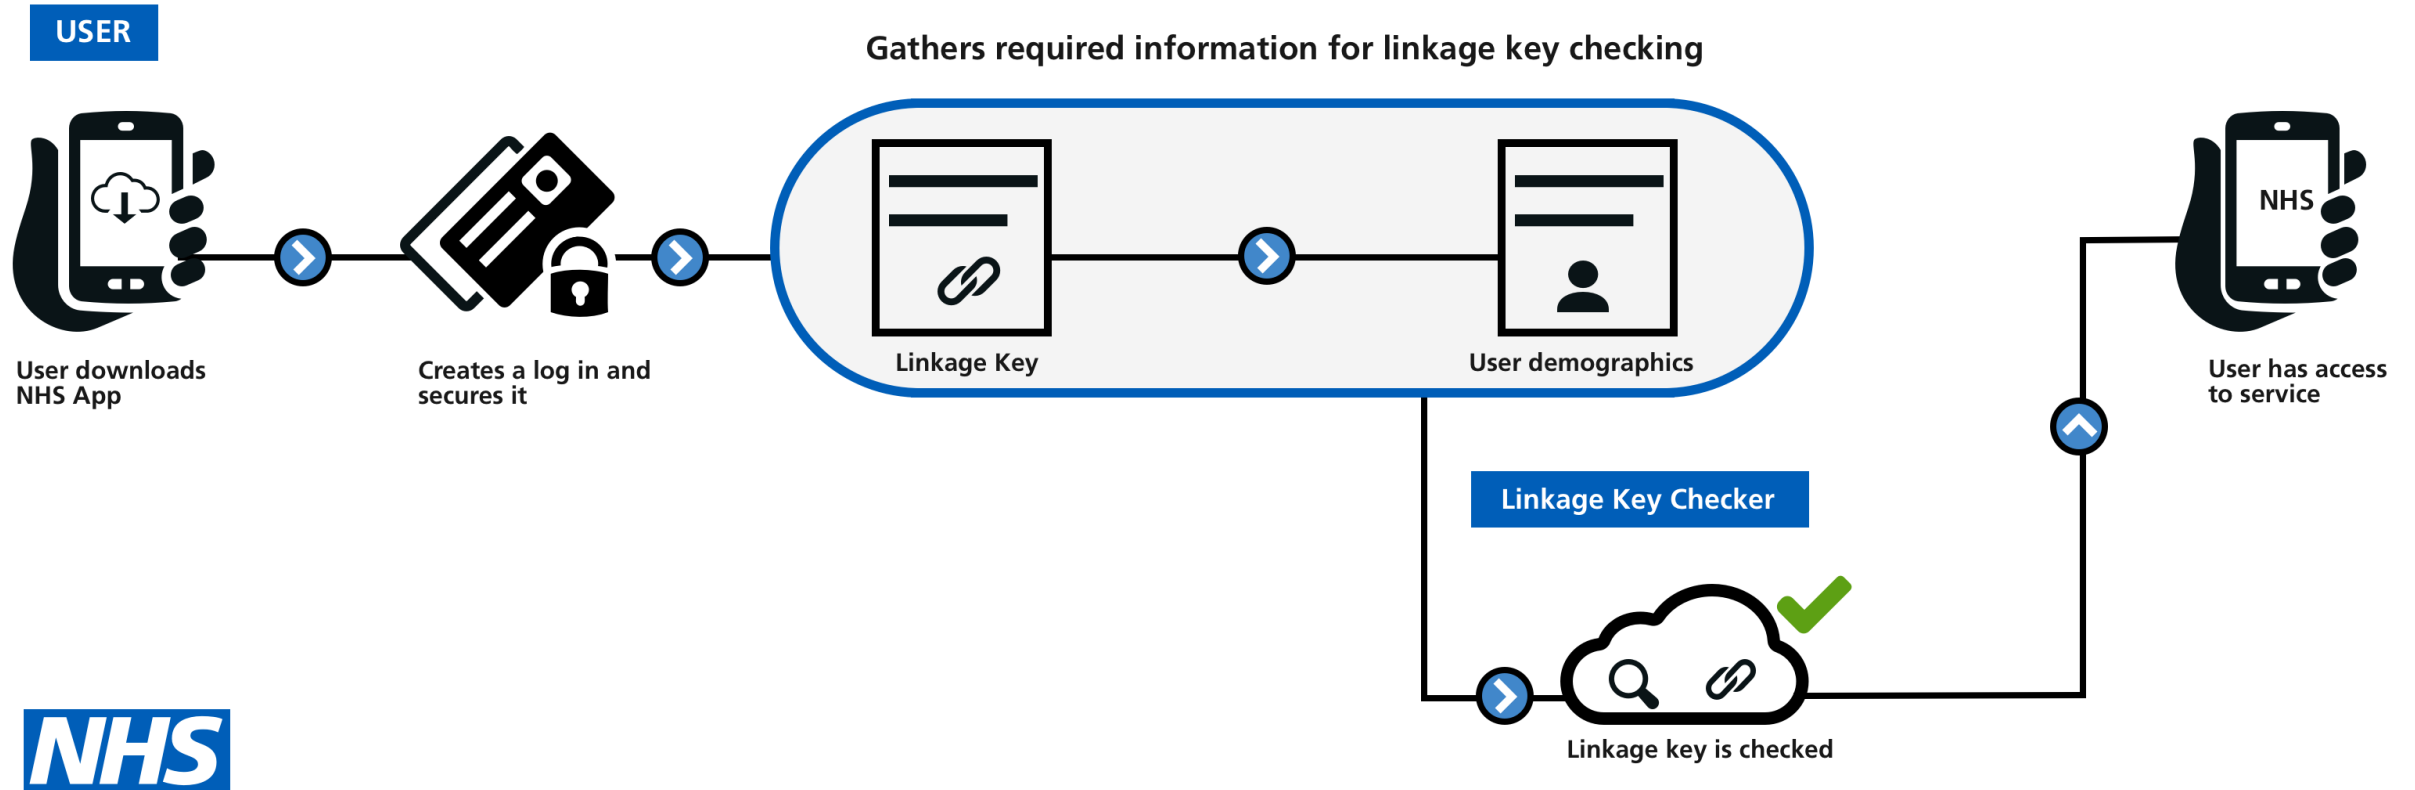

NHS login – Automated Prove Your Identity

USER Gathers required information for ID Checking and Matching

NHS Login – Patient online (linkage key)

Offline journey

A patient may need to come to the GP practice to ask for support if:

- they do not have photo ID that NHS login can accept
- their ID check was unsuccessful, or their details could not be matched to their GP record successfully
- their previous GP Online registration details have expired (this expires after 14 days)
- they prefer to use this method rather than the ID and video method
- they have moved GP practice recently, and originally verified their identity for NHS login using GP Online (linkage key) details
- the practice has recently changed clinical system supplier

How to help your patients get online

Verifying a patients ID, you can help by:

- Providing them their GP online registration details (linkage key), or
- Resetting and reissuing their details if they're already registered with GP online services

How to provide your patient with a linkage key

EMIS

1. Go to 'Registration' and select the patient
2. If the patient is under 16, you need to **add the code EMISNQC0278**, which means 'Competent to consent to online access' to their record before you start registration
3. On the Registration screen, click the Patient Services tab.
4. Click Add online user > Add current patient.
5. Complete the Online user screen (follow your practices procedure for verifying identity)
6. Click 'OK'
7. Select how you want to send the PIN document

TPP SystmOne

Make sure the patient's email address has the status of **'verified'** selected against it within the patient record. (This needs to be verified for NHS Login to be able to create a registration)

1. Confirm patient identity (follow your practices procedure)
2. Select **'Register for online services'** from the patient record
3. Send the account ID and the third-party passphrase via text or email, or print it out

Patients who are registered

As the third-party linkage/passphrase key expires 14 days after it was issued you will need to generate a new one

- Generate a new linkage key/passphrase in the patient record
- Do not choose to **'Reset user name and password'**, as this will not reset the details they need to register

Mobile Identity Verification – Fast Track

User has completed a medium level verification (P5) journey

User verifies NHS record information

User chooses to transfer a previous ID check for GP online services

High level verification (P9) is stored to the user's profile

What does a patient see? Setting up a test patient

in your clinical system

Test patients need:

- ✓ To be aged 16 or over
- ✓ Have an NHS number*
- ✓ Have an account in clinical system
- ✓ To have patient online services activated

Record the full name, postcode, linkage key and account ID to use later.

*if you do not have a test NHS number that's on the spine – contact nhsapp@nhs.net to request one

in the NHS App

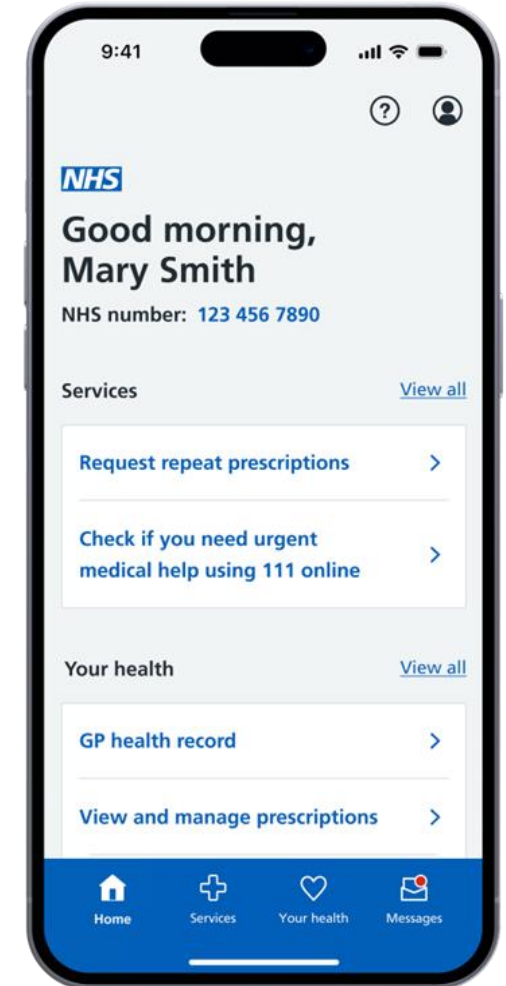

You will need:

- ✓ an apple or android phone or tablet
- ✓ an email account
- ✓ a mobile phone number, so you can get a text message even if you're using a tablet
- ✓ the full name, postcode, linkage key and account ID of the test patient account
- ✓ the practice's ODS code

Download the NHS App and follow the instructions to set up the account.

Top tips

- Encourage all staff to download and register to use the NHS App
- Identify and discuss benefits of digital for your practice and patient
- Familiarise yourself with the NHS Login journeys available
- Set up a test patient to understand what a patient can see

NHS App – core features

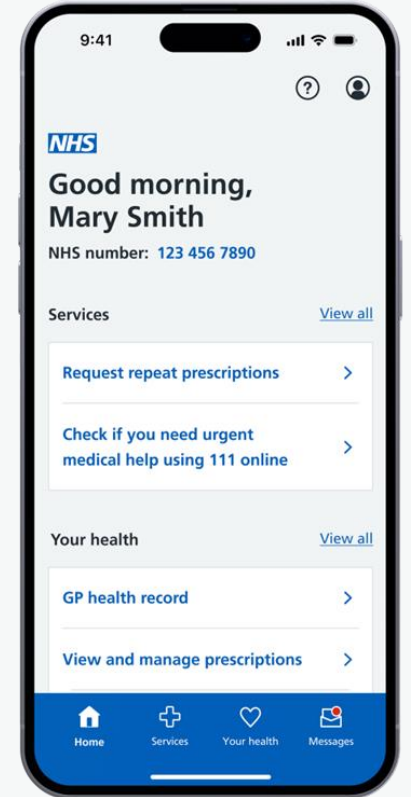

Request a repeat prescription

You can request your repeat prescriptions on the NHS App

You can request repeat prescriptions at a time that suits you. It's an easy, quick and convenient way to order on the go. There's no need to wait until the GP surgery opens or join a telephone queue.

Future Plans:

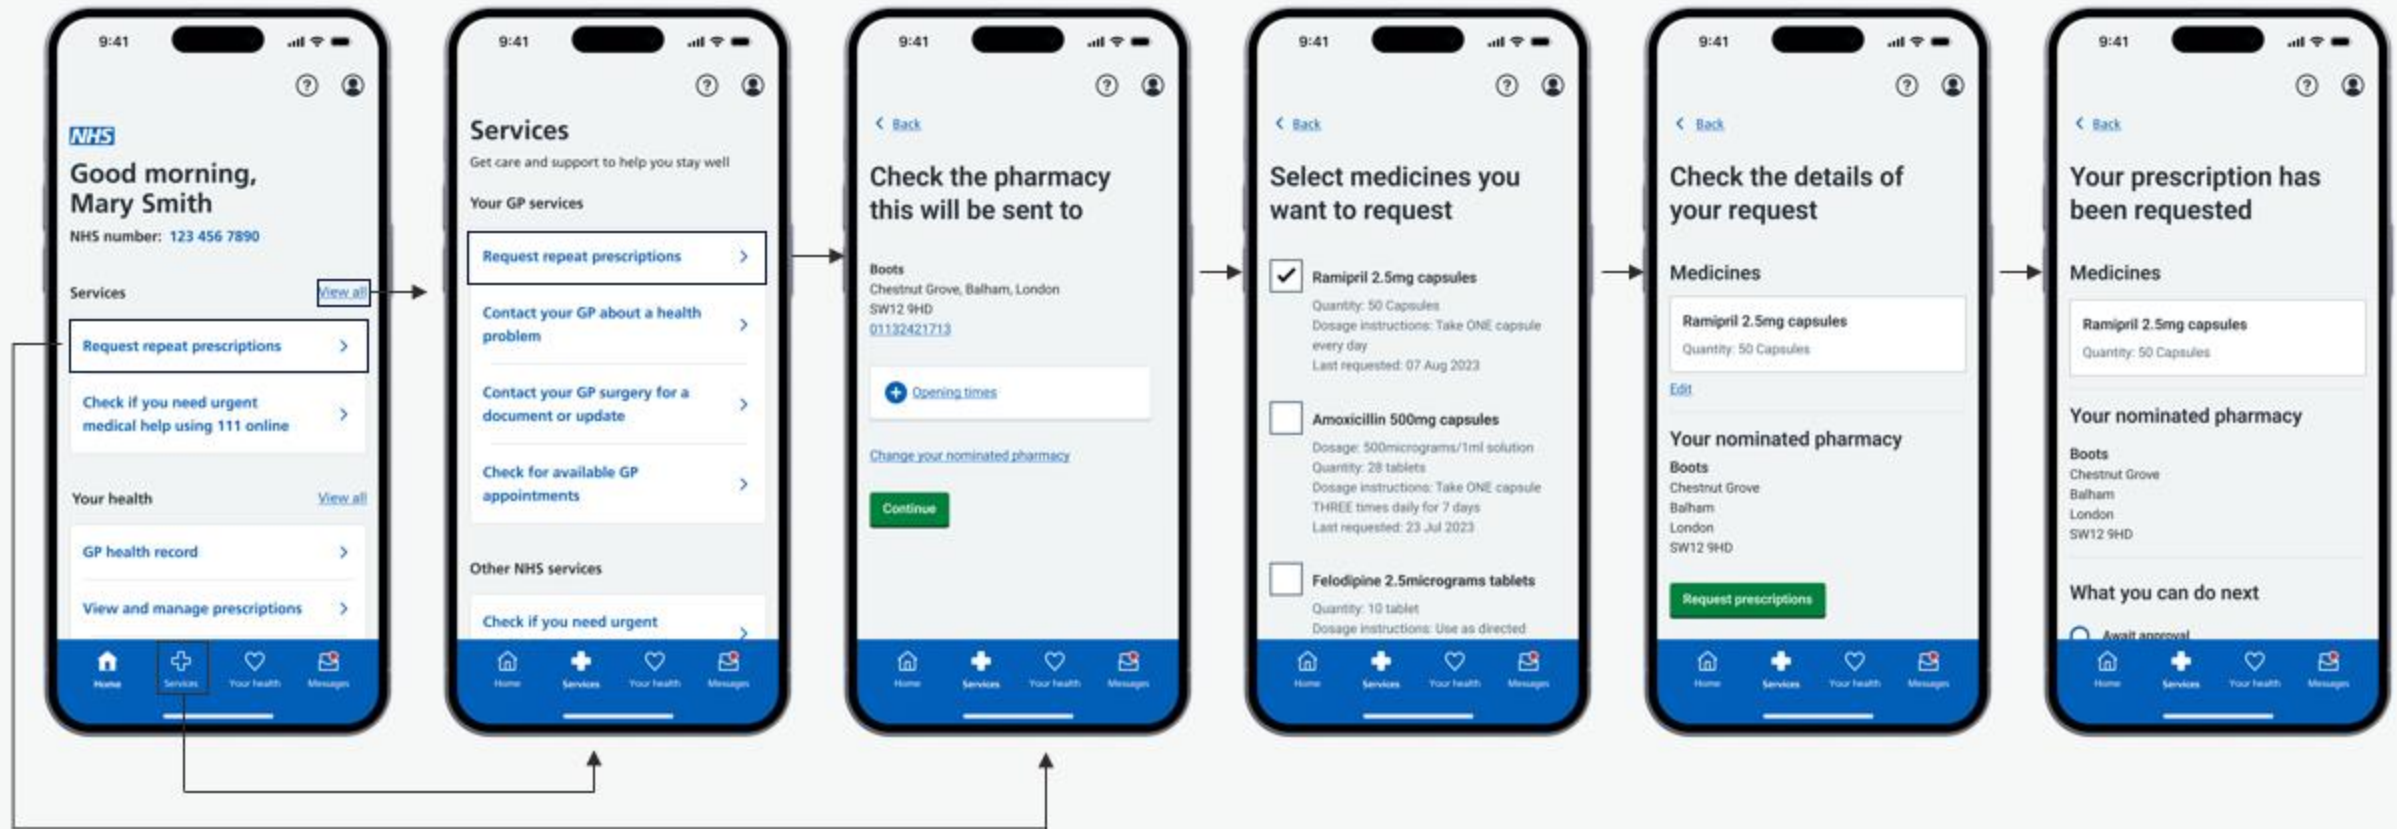

- Users can see the status of their prescription, including when it is ready to collect

Ordering repeat prescriptions on the App is expected to save 1.85 million hours of GP practice time in 2024

Request repeat prescriptions

View your prescriptions

See a list of your approved prescriptions in the App and get a barcode to present at any pharmacy to receive your medication

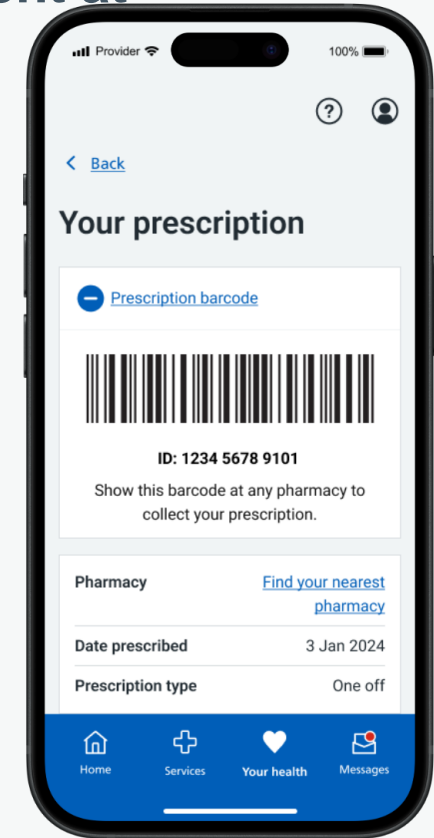

This gives you earlier visibility of what one-off and repeat prescriptions your healthcare provider has prescribed

If you don't have a nominated pharmacy you can use the barcode to collect it from any pharmacy.

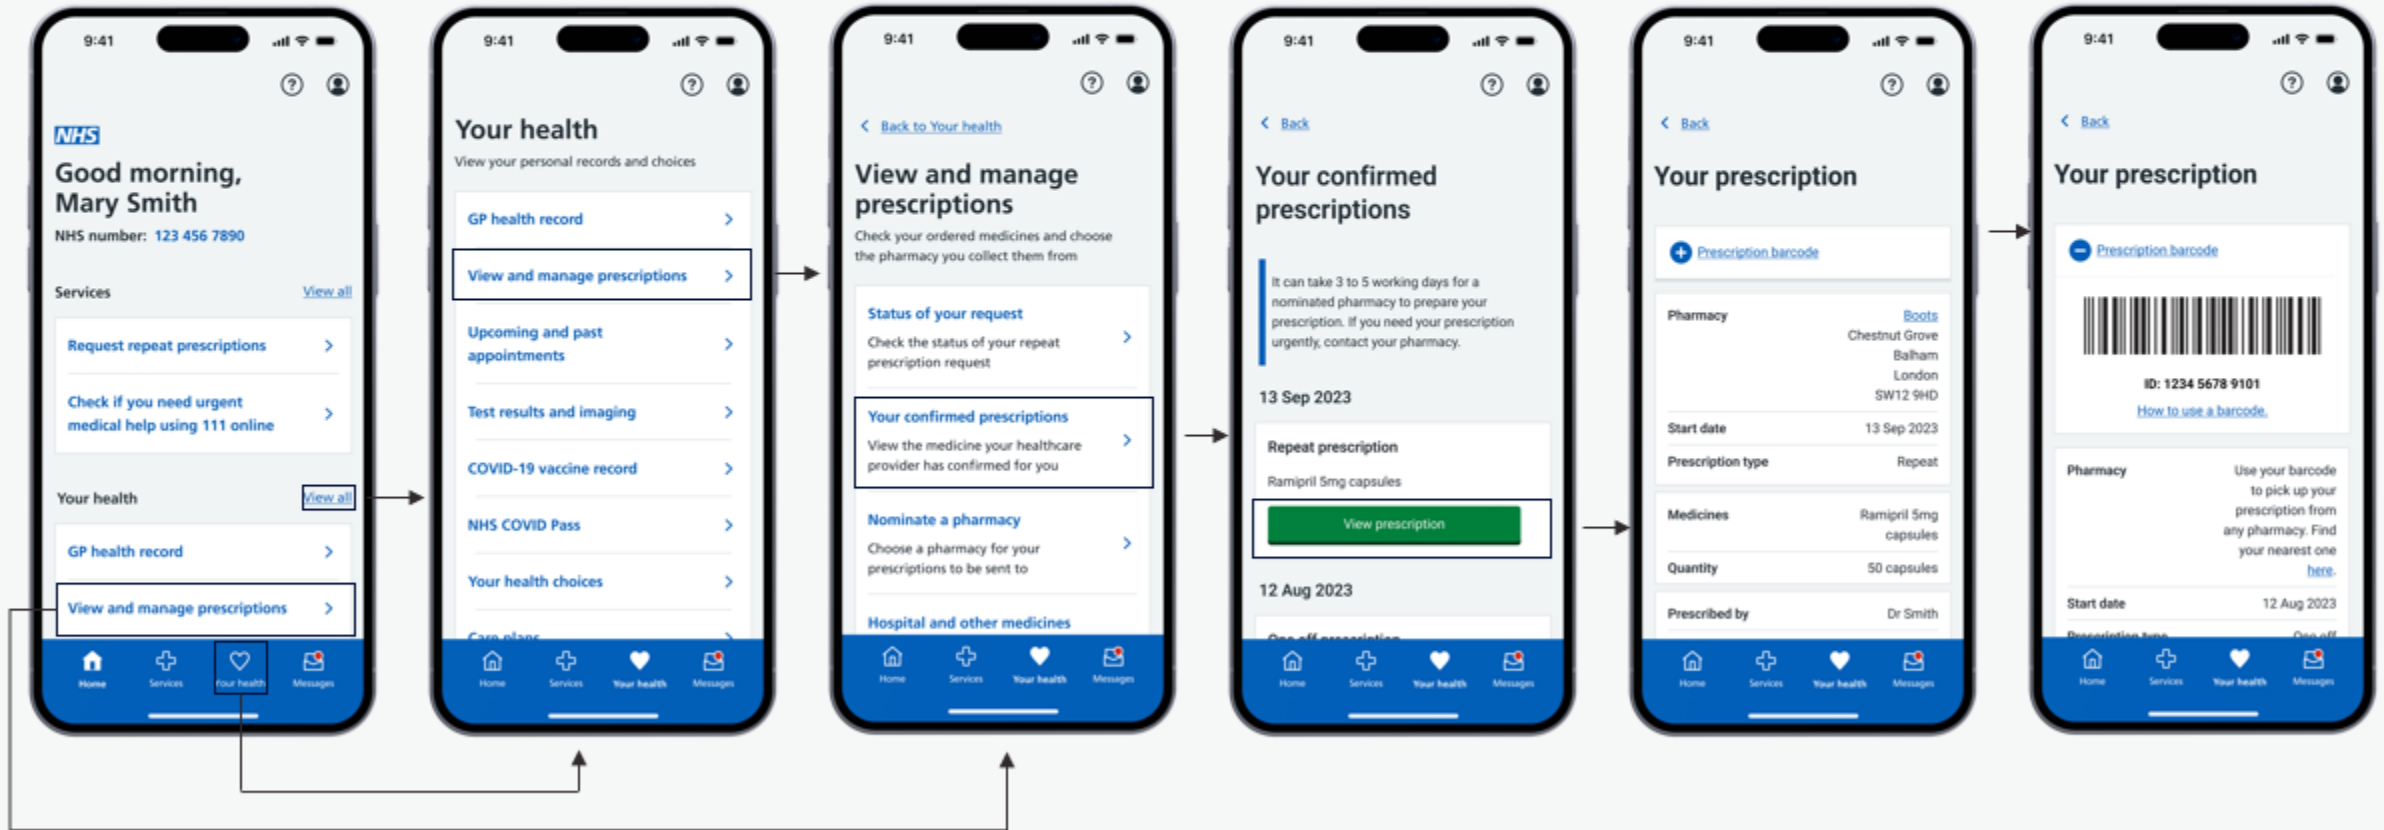

Future Plans:

- Users can add the barcode to their device's digital wallet.

16.8 million barcode views between January and October 2024, leading to over 500,000 hours of frontline staff time saved

View your digital prescriptions

Change your nominated pharmacy

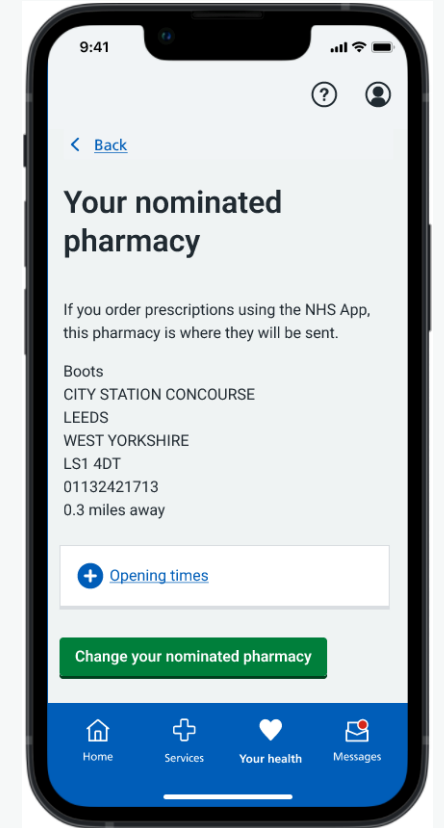

You can select the pharmacy that you will pick up your prescriptions from.

You can view and change your nominated pharmacy using the NHS App.

This does not include dispensing practices.

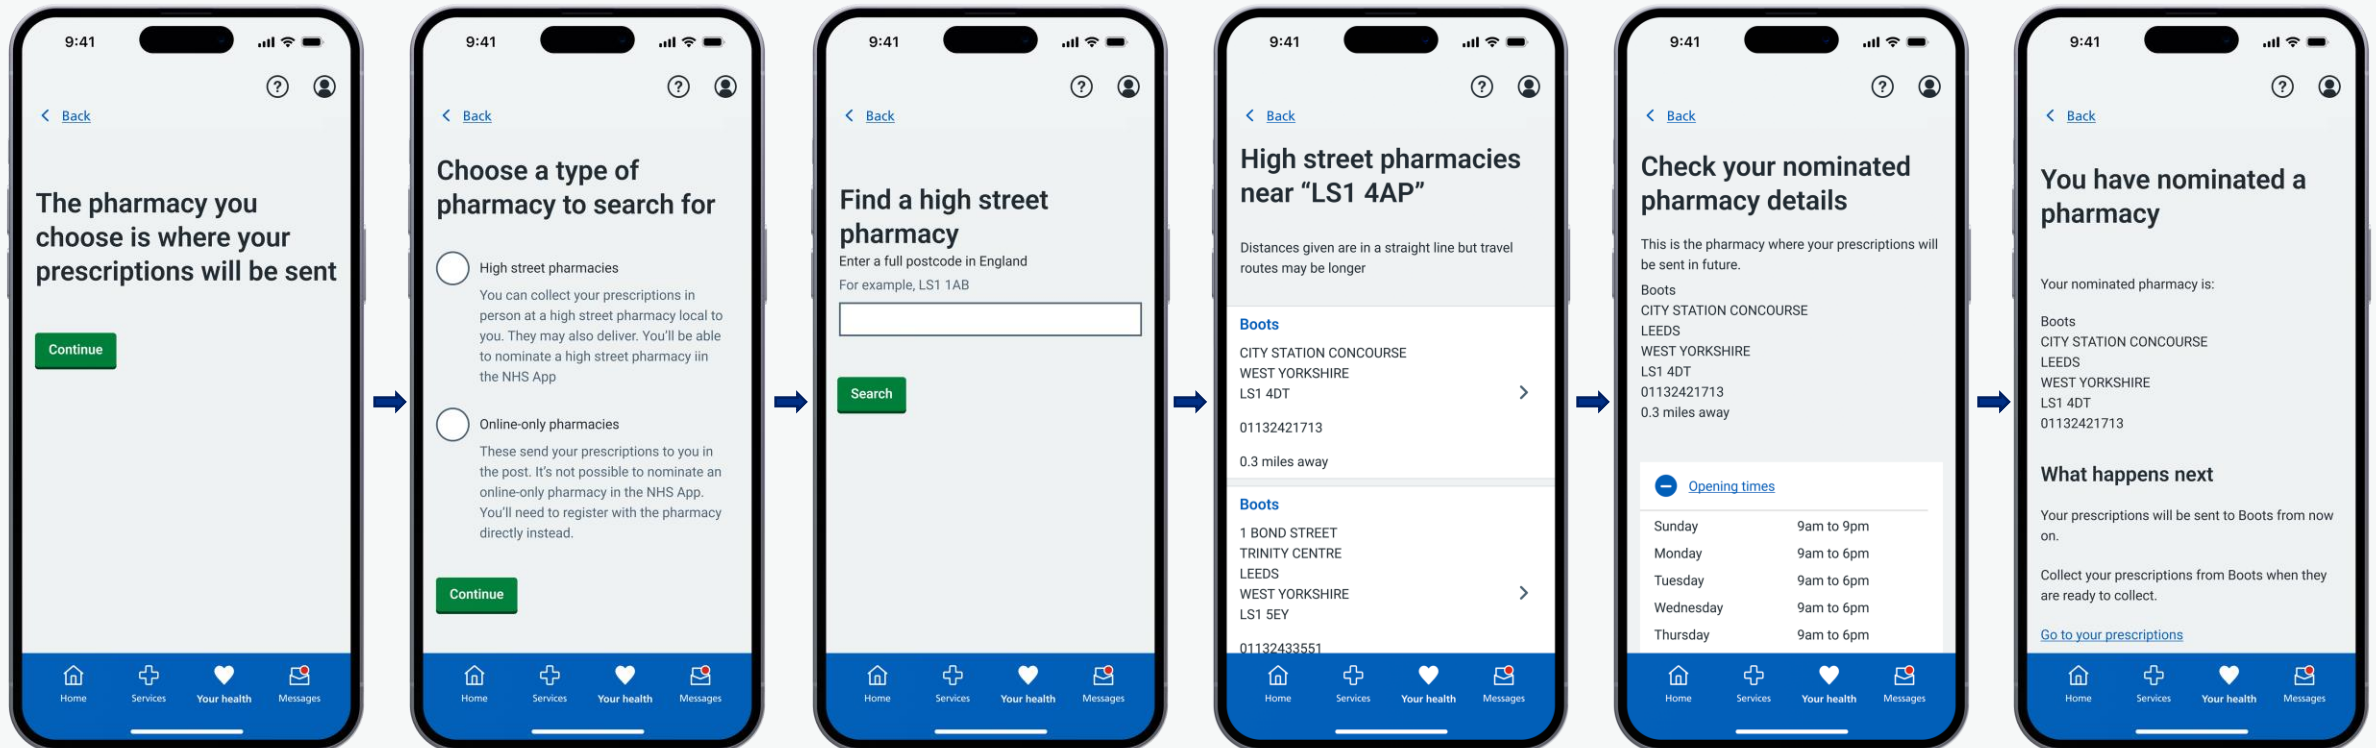

Future Plans:

- Users can nominate a distance-selling pharmacy

Nominate a pharmacy

Patients can view and change their nominated pharmacy and where their prescriptions are sent on the NHS App.

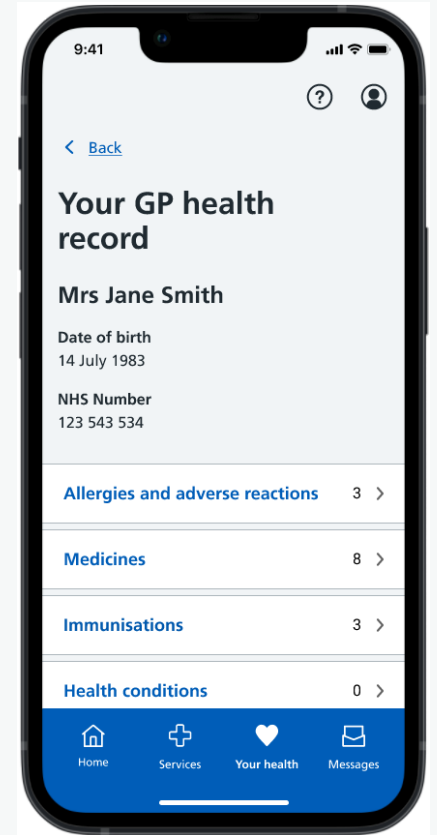

View your GP health record

Most users have access to their summary record from before Autumn 2023 and their full record after this date

Patients can request access to their full historic record from their GP.

Entries could include consultation notes, immunisations, test results and letters

GP health records were viewed 17.9 million times in September 2024 – up from 8.4 million views in September 2023

Promotional pack and walk-through video: [See your GP health record in the NHS App](#)

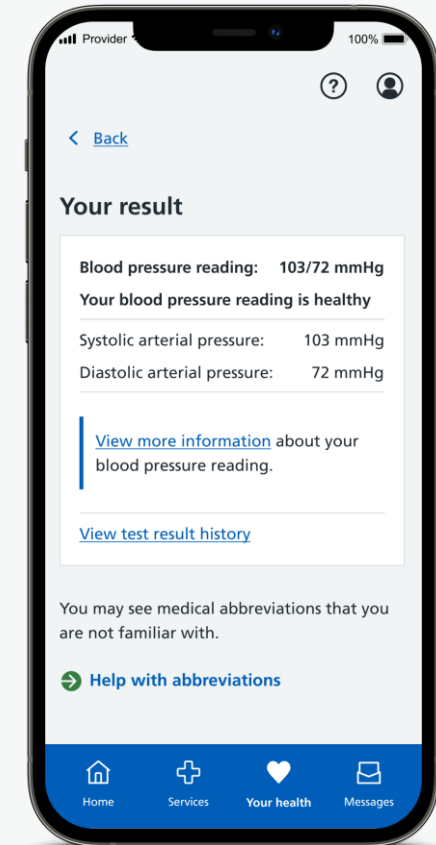

View your test results

If you are registered with a GP, and are aged 16 or over, you can view test results in your GP health record

Having access to test results in the NHS App means you don't need to contact your GP surgery to view your results.

HbA1c test results now display in a graph, enabling users managing diabetes to easily see trends over time.

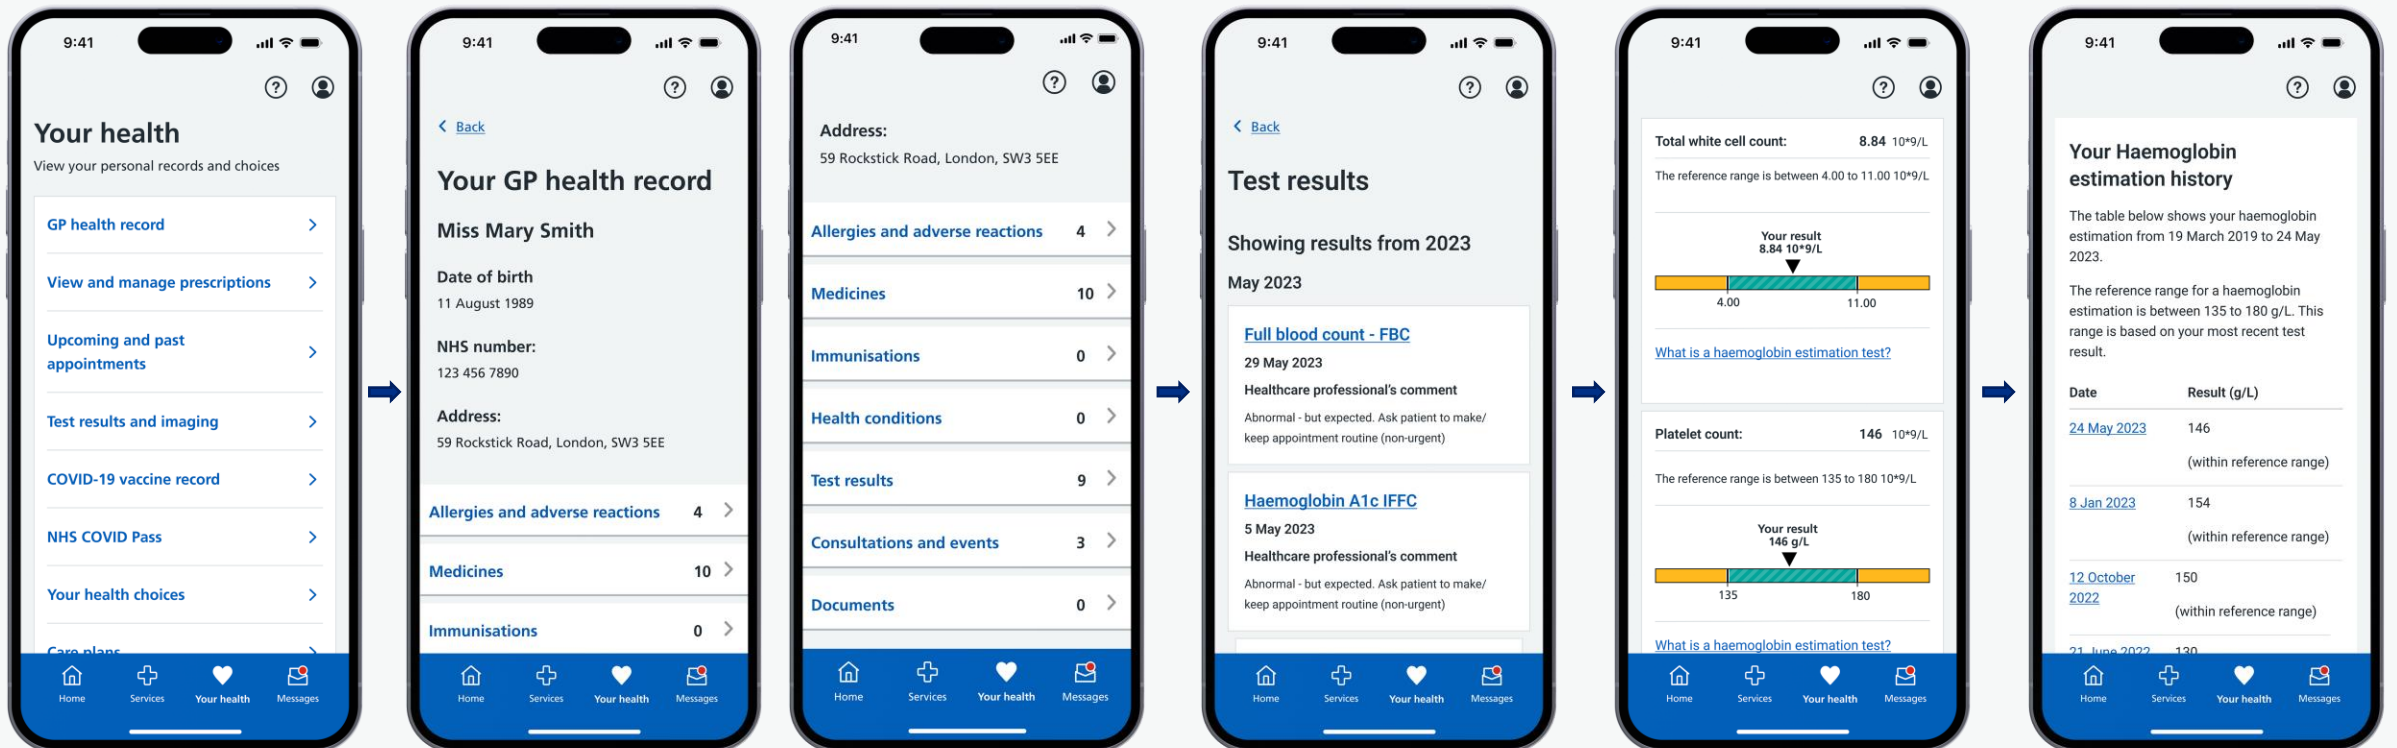

Test results is the most frequently viewed section of the GP health record

More information: [View your test results](#)

View test results

Test results are part of the GP health record. We have made some improvements to the way test results are displayed for EMIS users. We'll be making further improvements this year and have plans to explore how we can help trusts to make more digital test results available for tests which happen outside of GP practices.

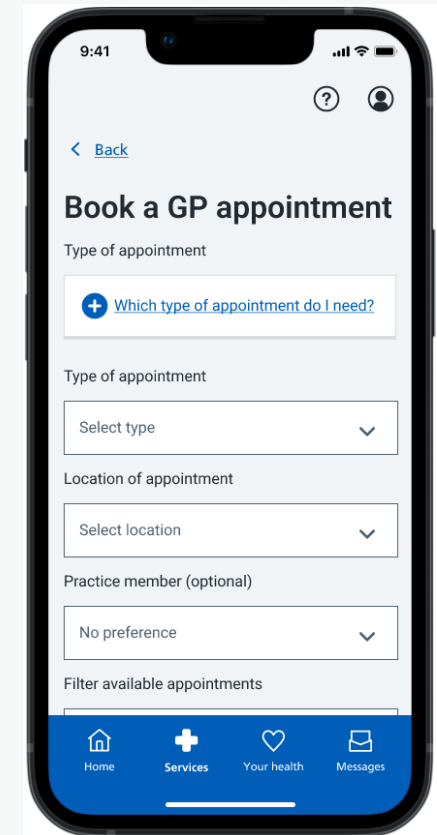

Book a GP appointment

Where available and enabled by your GP surgery, you can book GP appointments

Users can book, manage and cancel your GP appointments using the NHS App.

Future Plans:

- Making it easy for users to add GP appointments to their device's calendar application
- Improving the GP appointment booking journey, including better navigation between the core NHS App journey and online consultation services

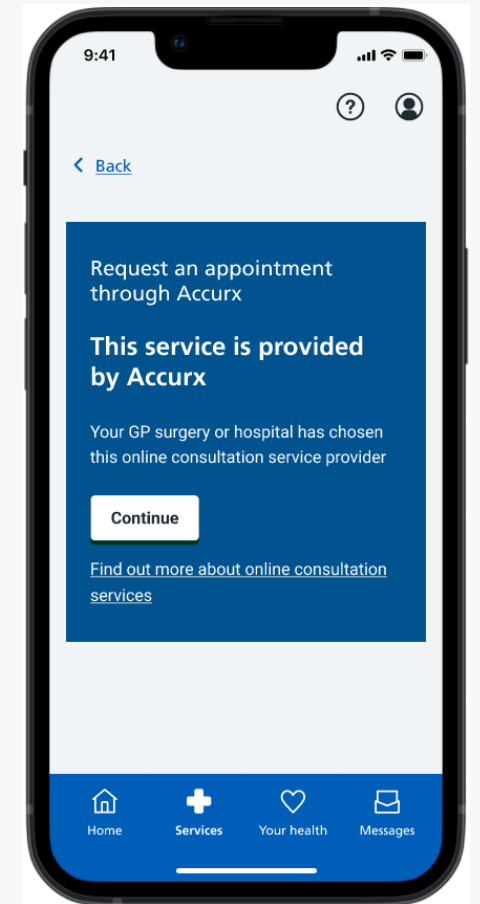

Online consultation services

You can request care or ask a question using an online form in the NHS App

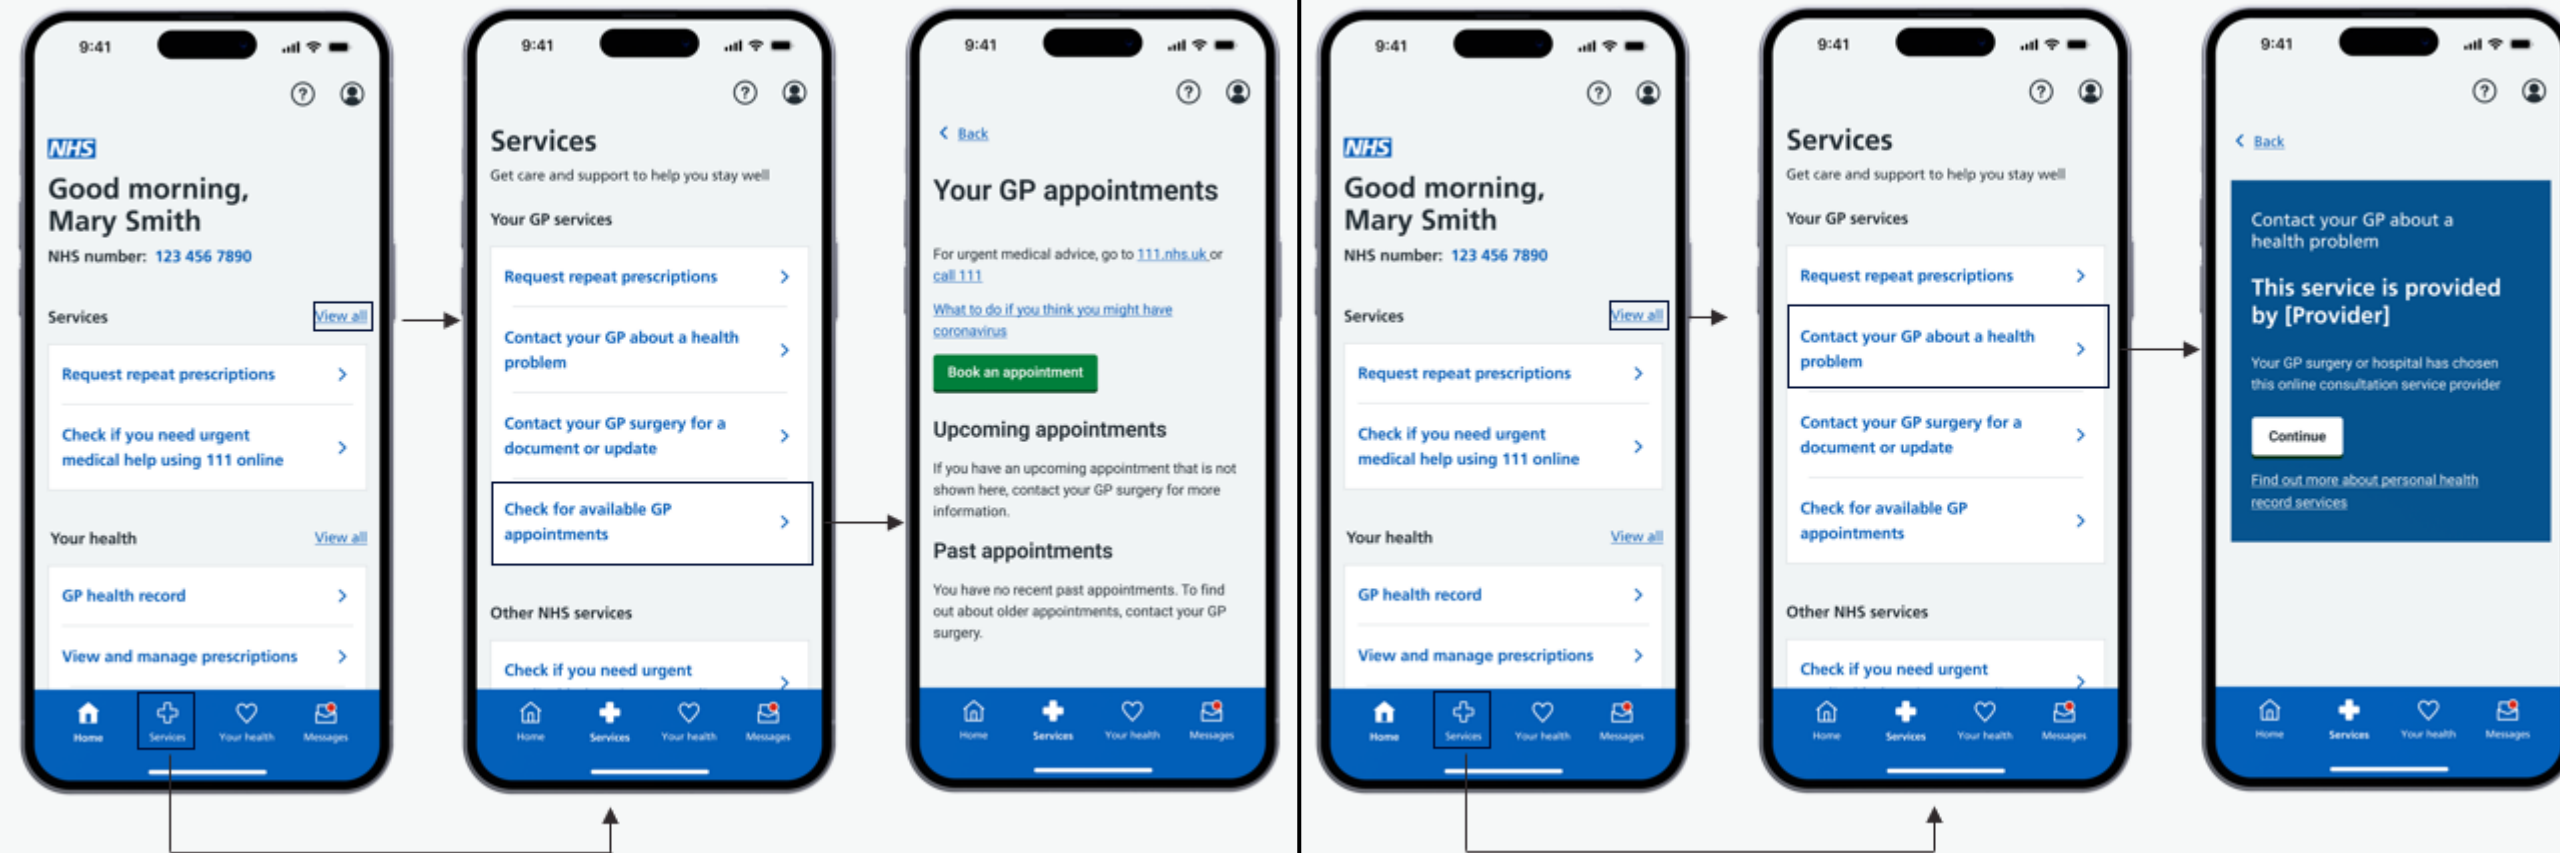

You can ask your GP for medical advice, as well as request test results, fit notes or referrals using online consultation services.

Future Plans:

- Integrating more third-party online consultation services
- Improving how users navigate to online consultation services

Upcoming & past appointments/check for available GP appointments & Contact your GP about a health problem

Menti.com - use code 1978 2671

Notifications and messaging

Receive messages from your health and care providers via the NHS App

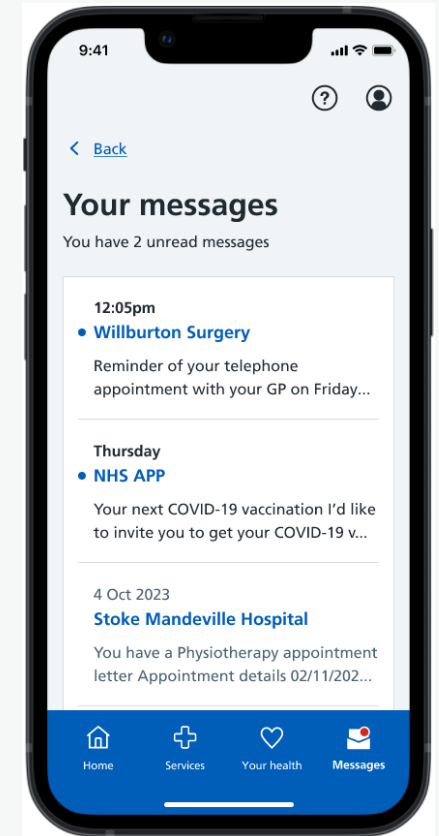

Turn on notifications for the NHS App to get messages from your trusted healthcare providers

It is a secure and simple way to stay up to date.

Future Plans:

- More services can send more types of message through the NHS App
- Users can more easily manage their inbox

During 2023/24, 22.5 million messages were sent through the NHS App, saving the NHS £1.1 million

4 key benefits

Reduce spend on patient communications

Safe and secure messaging

Messages from multiple care settings in one place

Unaffected by contact detail changes

During 2023/24, 22.5 million messages were sent through the NHS App, saving the NHS £1.1 million

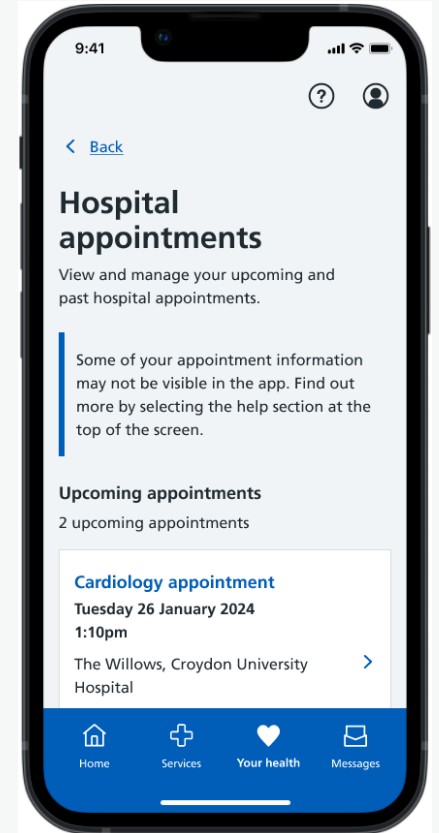

Hospital appointments

Where enabled, patients can view and manage their hospital appointments.

Available at [103 acute trusts](#), users can view and manage their hospital referrals and outpatient appointments. Some trusts also have enabled additional features, such as the ability to send messages, and share documents and questionnaires.

Future Plans:

- Increasing the number of hospital trusts that can surface users' appointments in the App
- Allowing users to view and manage their inpatient and day case appointments

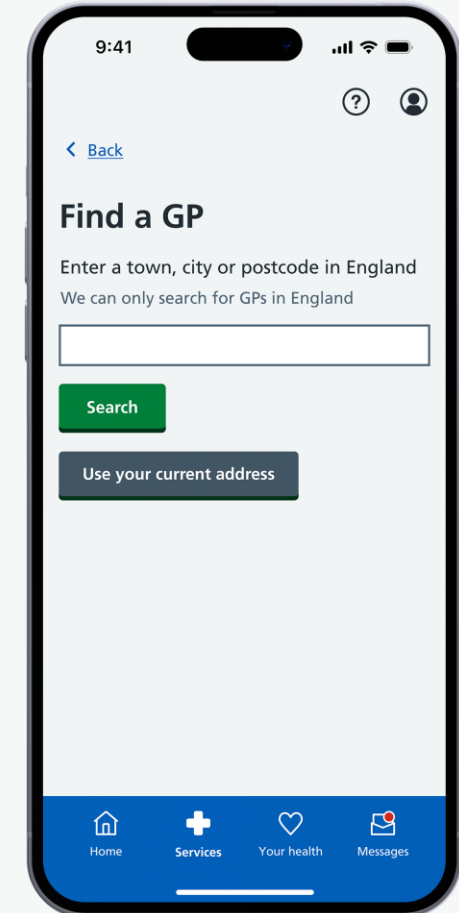

Register with a GP online

You can register for a GP online using the NHS App

The service is available through the NHS App via the NHS website's Find a GP service.

The service is user-friendly, accessible, captures access needs and has a high satisfaction rate, with 95% of patients reporting a positive experience

GPIT Primary Care Transformation Programme

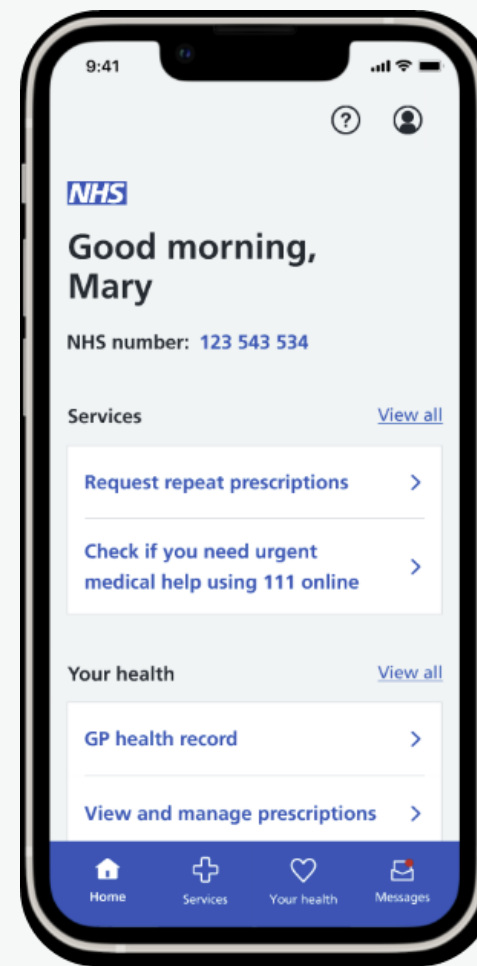

Spotlight on Digital Champions in North Central London

Patient Centred Digital Care: Transforming Repeat Prescriptions to Online, at Lane End Medical Group

as shared by Manisha Patel

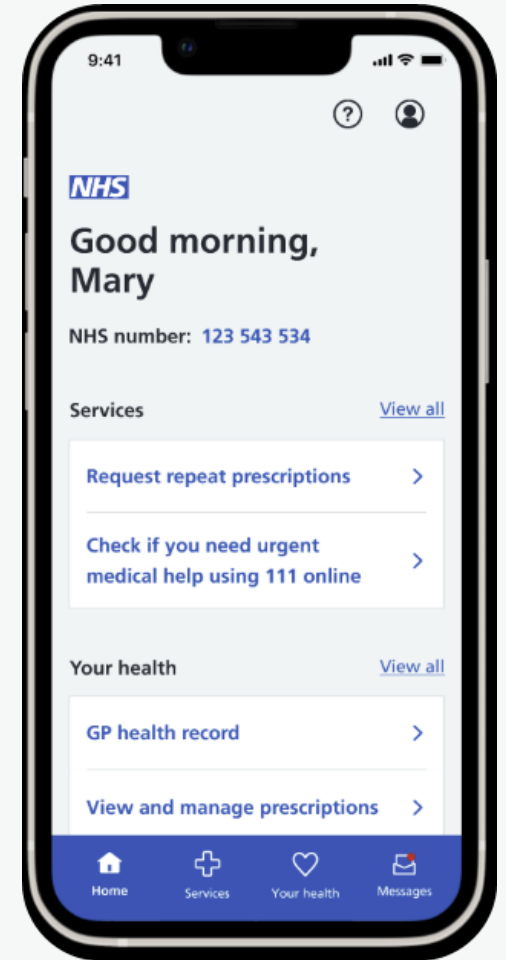

Managing Partner

Lane End Medical Group

Enhancing patient access and experience at Lane End Medical Group, North Central London

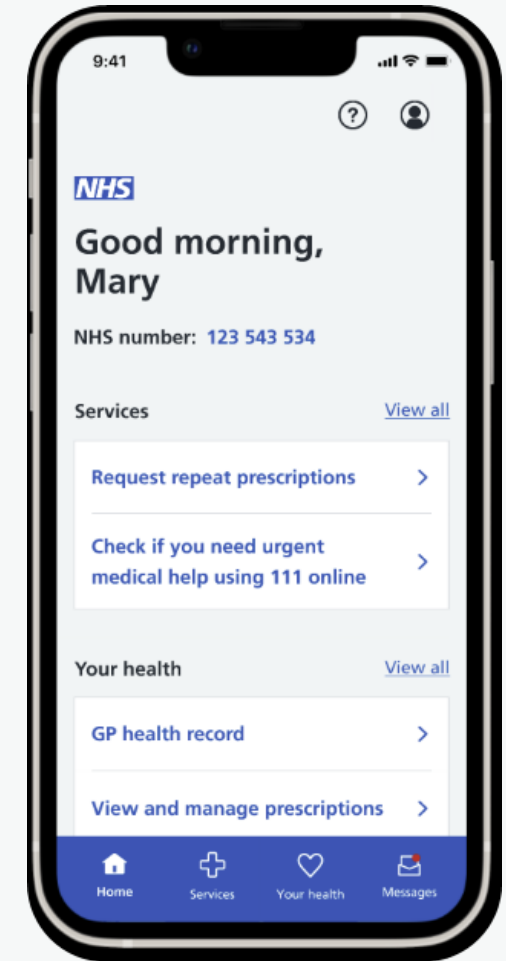

- In an era where digital transformation is revolutionising healthcare, Lane End Medical Group has emerged as a digital champion, leading the shift from paper-based repeat prescriptions to a fully online system via the NHS App.
- Their commitment to innovation has not only improved efficiency but also enhanced patient access and experience.

Overview: Lane End Medical Group, North Central London

Lane End Medical Group, 2 Peshurst Gardens, Edgware, Barnet PCN 4

- *Lane End Medical Group is comprised of **General Practitioners** who have worked together for many years. We are well **supported by our allied health professionals, reception and administrative teams.***
- *We provide a **high standard medical services** complemented by our child health and immunisation clinics, supported by our health visitor. Other services provided include: cervical cytology (smears), family planning and chronic disease care.*
- *We are an **accredited undergraduate and postgraduate training practice** with highly experienced trainers.*
- *We **recognise the importance of public opinion** and have formed a **Patient Group** to help us continue **to provide high quality care for our patients** and help develop new services in the coming years.*

Enhancing patient access and experience at Lane End Medical Group, North Central London

Changes to Repeat Prescription Ordering from 1st January 2025

- Since 1 January 2025, and following a period of consideration and preparation, Lane End Medical Group, no longer accept paper requests for repeat prescriptions. Instead, patients are encouraged to use the NHS App, a secure and convenient way to manage medications online.

Supporting Patients with Access Needs

- Recognising that not all patients are familiar with digital tools, the practice has adopted a patient-first approach. Rather than simply implementing the change, they ask, *How can we support you?* Staff ensure that those patients who are new to the app, and needing assistance, such as elderly patients, or those with disabilities, receive the necessary support to transition smoothly. For those patients unable to access the NHS App, alternative solutions are available to ensure they can still order their medications easily.

Enhancing patient access and experience at Lane End Medical Group, North Central London

Empowering Patients, Reducing Workload

- By embracing the NHS App, the practice has reduced administrative burdens on staff, allowing them to focus on patient care rather than paperwork. Previously, processing paper-based requests was time-consuming. Now, with digital requests, prescription management is streamlined, ensuring quicker improved processing of requests.

The Patient Benefits: Convenience and Accessibility

- For patients, the shift to digital ordering means 24/7 access, faster processing, and the ability to track prescription requests, reducing uncertainty and improving medication adherence.

Enhancing patient access and experience at Lane End Medical Group, North Central London

Promoting the NHS App

- The team at the surgery also use these opportunities to let patients know about all the services available through the NHS App, as part of their daily interaction with the patients.

A Model for Digital Transformation

- Lane End Medical Group success in transitioning to online-only repeat prescriptions via the NHS App shows their commitment to improving patient access while modernising healthcare delivery. By engaging, supporting, and empowering patients, they are proving that digital transformation is not just about technology it is at its core about people.

For practices considering a similar shift, the key takeaway is clear: **engage, support, and empower your patients to embrace digital solutions.**

NHS App – additional features

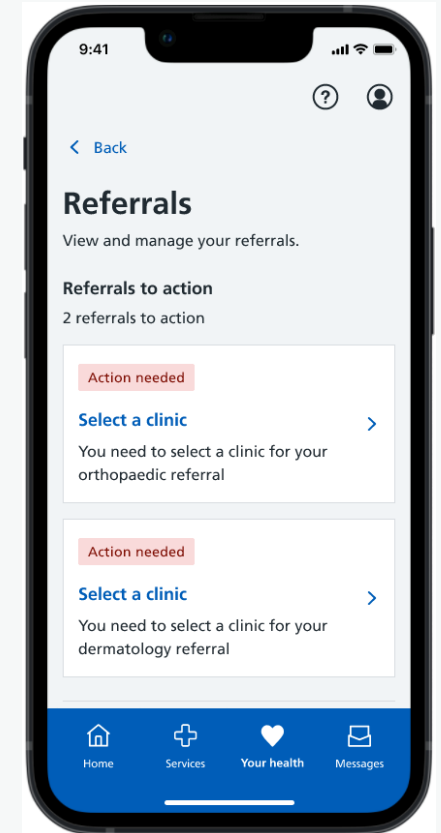

Manage your referral

You can manage your first GP referral to a hospital or clinic in the NHS App

You can manage your referral if you were referred through the NHS e-Referral Service (e-RS). You can use the NHS App to book, view, reschedule and cancel your first appointment.

This means GP practices do not need to print or post booking instructions.

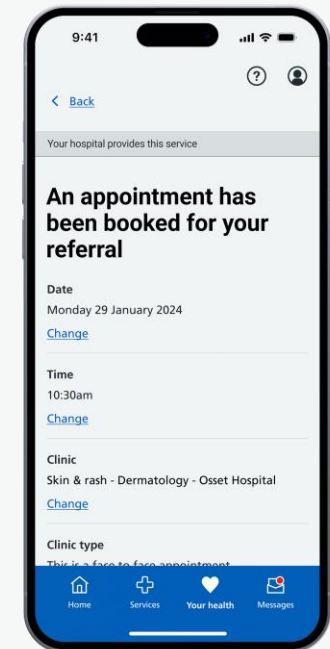

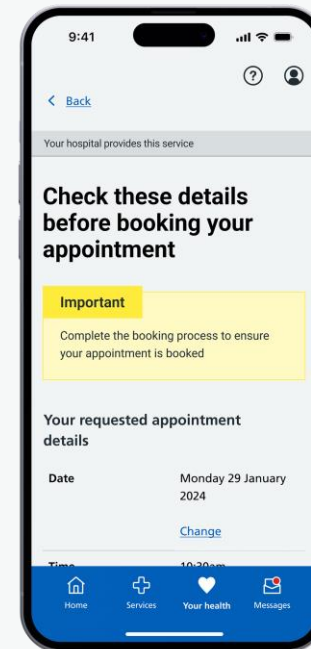

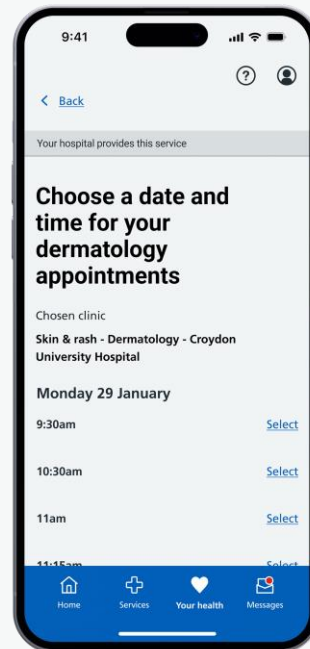

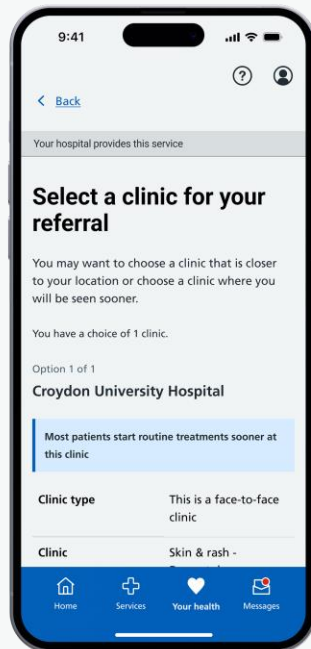

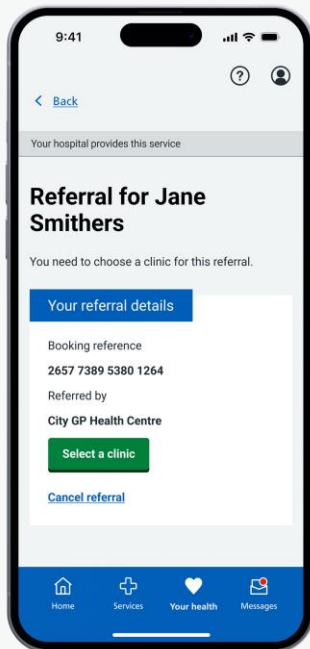

**Average 503k monthly uses by users with referrals
(Mar 2023 to Feb 2024)**

Electronic referral Service (e-RS)

When a practice makes a referral to a specialist at a hospital or clinic, using the NHS e-Referral Service, the patient can manage their first appointment themselves, on the NHS App, by clicking on Hospital and other appointments.

This means practices do not need to print or post booking instructions. The patient can easily book, check, change or cancel their appointment online.

Manage healthcare on someone else's behalf

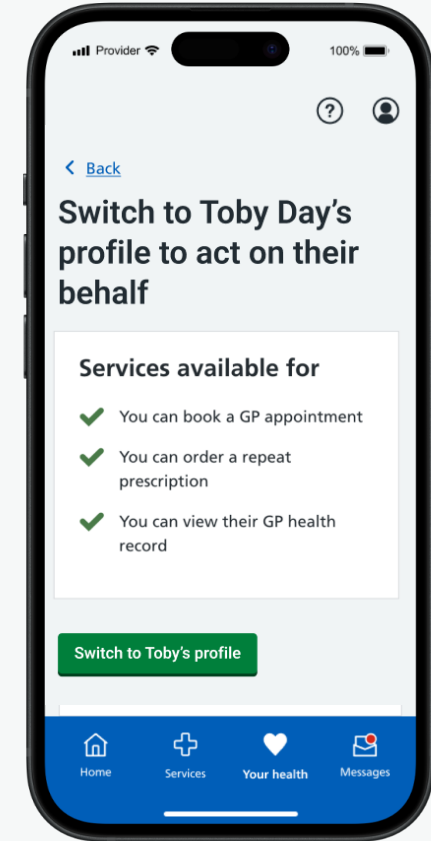

Linked/Proxy profiles

Allows you to access healthcare services on behalf of someone you care for, where appropriate consent is in place, and you are both at the same GP practice.

For example, you could order and collect a repeat prescription for someone you care for.

Future Plans:

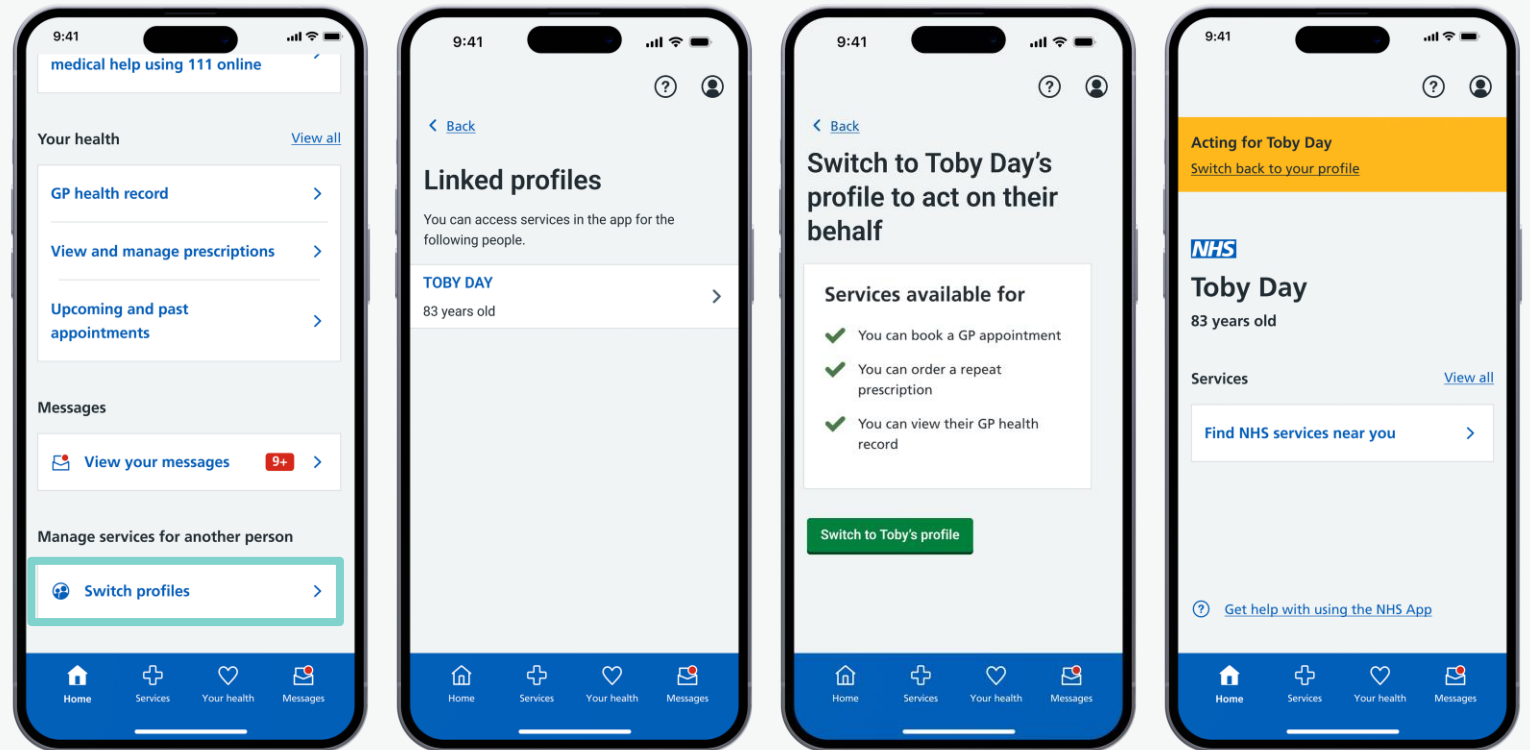

- Integrating the new [apply for proxy access service](#) which makes it easier for users to send applications for proxy access to their GP surgeries

Linked accounts

Linked accounts allow patients, family members and carers to access health services on behalf of other people, where appropriate consent is in place. There is work happening in NHS England to improve the experience of proxy accounts.

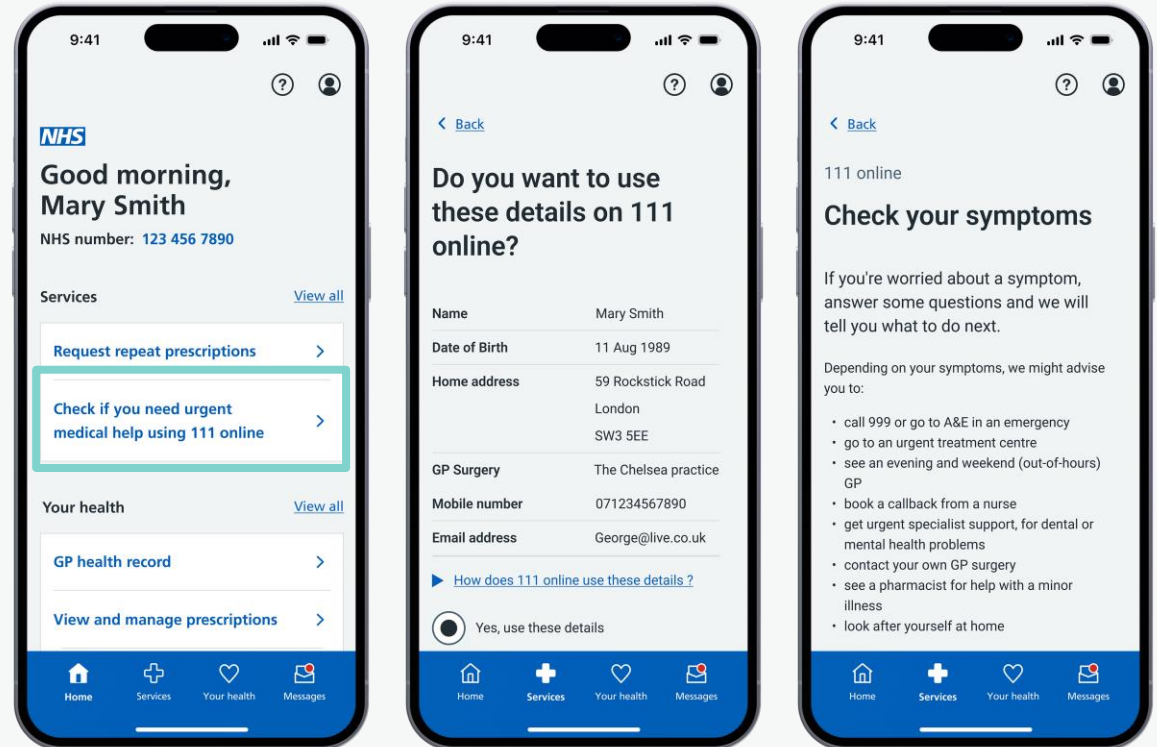

An example of this is when a carer requires access to nominate a pharmacy; the carer can both order a prescription and nominate a pharmacy for delivery near them, so they are able to safely collect and deliver it to the patient.

NHS 111 online

If people think they need help right now, they can use the NHS App to check their symptoms via the NHS 111 online service.

- Integration with NHS login to carry over their details.
- 'Check if you need urgent medical help' is on the NHS App homepage and Services page.

Go to the NHS website in the NHS App

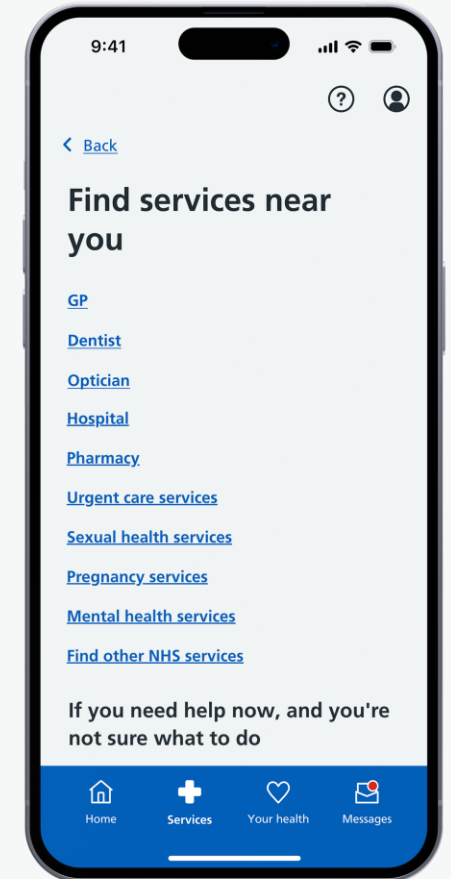

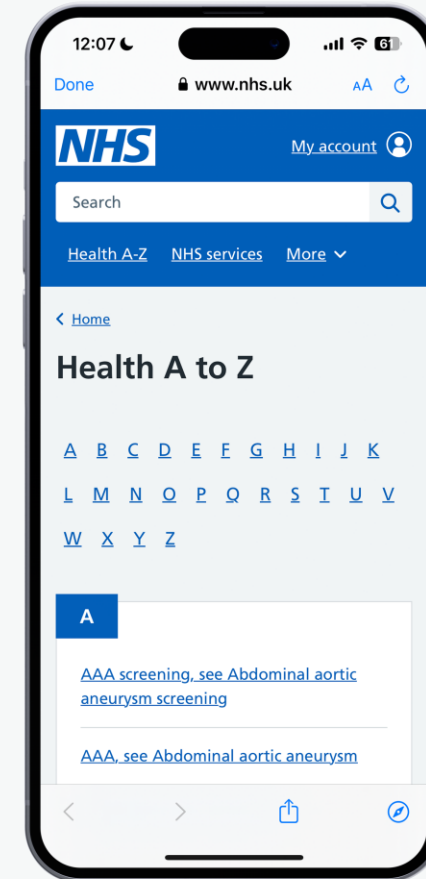

Health A-Z

The NHS App enables people to get trusted NHS information and health advice on hundreds of conditions and treatments.

Find NHS services near you

On the homepage of the NHS App, people can 'Find NHS services near you'. This includes:

- General practices
- Dentist
- Pharmacy
- Mental health services
- And many more

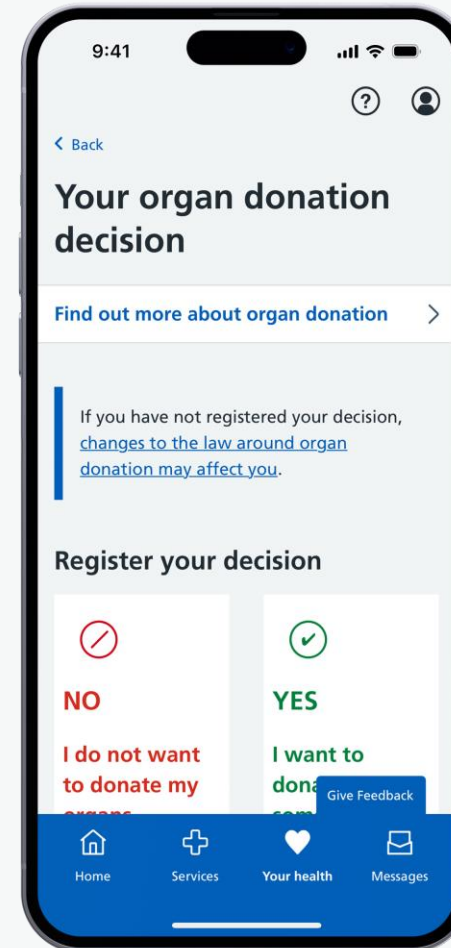

Organ donation decision

People can manage their organ donation decision on the NHS App.

They can register a decision for the first time or change a decision they have previously made.

Keeping this decision up to date helps families, should organ donation be possible.

584,583 organ donation preferences managed since 31st December 2018

Be Part of Research

Register to be part of health research

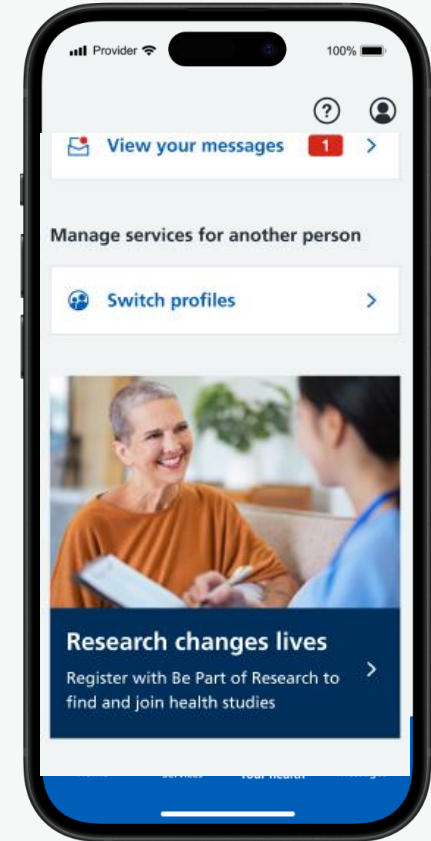

You can register to get updates about health research you may be interested in joining.

This makes it easier to take part in wider research.

The service is run by the National Institute for Health and Care Research (NIHR).

Be Part of Research currently features on the NHS App homepage.

As of October 2024, 437,204 volunteers registered on NIHR's Be Part of Research registry, of whom 96% registered via the link on the NHS App

Top tips

- Familiarise yourself with the App and the features
- Encourage all staff to direct patients to view their test results in the NHS App
- For those practices that do offer online bookable appointments, ensure appointment names are clear and simple to understand
- Encourage patients to switch on push notifications in their device setting so they can receive in-app messages
- **Remember**, the NHS App mirrors what is in your GP system

Future Developments

The NHS App roadmap

The NHS App team are always working to improve the NHS App.

Tableau Dashboard Walkthrough

Accessing the dashboard

How to access the dashboard

The dashboard can be found by [logging into NHS England Apps](#) with an OKTA account and searching for 'NHS App Reporting Dashboard'.

▼ [I do not have an OKTA account](#)

[Register for an OKTA account](#) and wait for your account to be set up, before following the process above.

You may have to wait up to 30 minutes before gaining access. If you still cannot get access after 30 minutes, contact IT and raise a ticket via IT.support@improvement.nhs.uk.

Last edited: 16 March 2023 10:42 am

Common Issues

How and when to raise to NHS England

If you have a patient raising an NHS App issue and it is not something you can resolve, encourage the patient to raise this directly to us via one of the following contact forms:

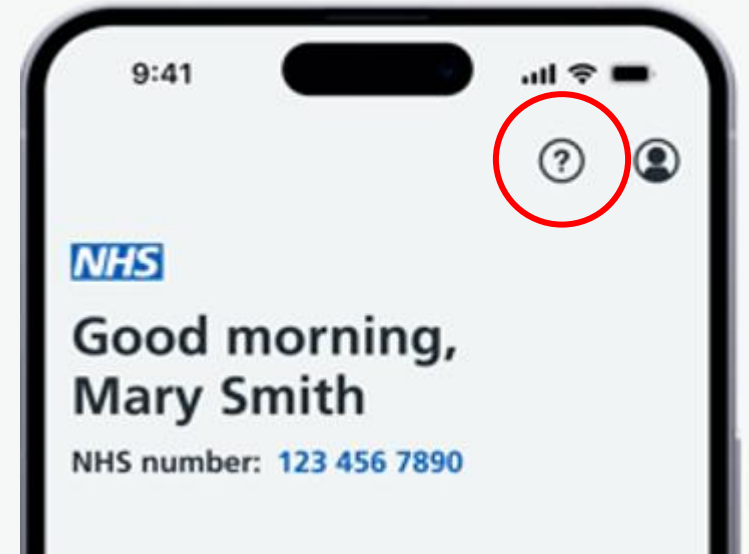

- **NHS login issues** (*logging in, registering, verifying their identity, changing account login details*): <https://help.login.nhs.uk/>, contact form found under “error messages and support section”.
- **NHS App issues** (*after logging in, any issues experienced by users accessing or using the features and functions*): <https://www.nhs.uk/contact-us/nhs-app-contact-us/>

If they cannot, or do not, want to do this themselves, you can choose to raise this to our service desk on their behalf. If you do this, please provide us with the following information:

- Patient name
- Patient email address associated with their NHS login account
- Description of issue, and any triage steps you have taken to date
- Confirmation that the patient consents to you raising this on their behalf (you must seek this)

Help with the NHS App

- Go to 'Help' in the top right-hand corner of the app and scroll down to 'Contact the NHS App team' to complete an online form
- Visit: nhs.uk/helpmeapp for lots of help and support, and to raise a ticket with the NHS App helpdesk
