Diabetes Complete

Diabetes Complete is an online interface allowing effortless management of your diabetes patients through seamless integration with all practice clinical systems and alignment to the National Diabetes Audit criteria.

It has been specifically designed to reduce GP workload through the empowerment of your wider practice team to deliver exceptional diabetes monitoring and treatment.

IDENTIFICATION OF WHERE YOU ARE

Identification of how your GP Practice is performing relative to key diabetes targets allows your practice to focus on priority areas to deliver the best diabetes outcomes.

IMPLEMENTATION OF MONITORING REQUIREMENTS

By continually monitoring your patients and highlighting priority 'calls to action' related to the key care processes, the Diabetes Complete interface enables your practice to implement optimal diabetes patient monitoring. Each of your diabetes patients will have a risk rating for completion of their key care processes to enable identification of patients needing additional attention.

IMPLEMENTATION OF TREATMENT STANDARD REQUIREMENTS

Through dynamic tracking of all your diabetes patients' clinical results, the interface will highlight those patients in need of intervention and treatment pathway optimisation.

IMPLEMENTATION OF LOCAL PRIORITIES

Local priorities can be implemented within Diabetes Complete. Specific priority patient cohorts and clinical targets can be built into the interface which in turn will drive implementation and target attainment related to these priorities.

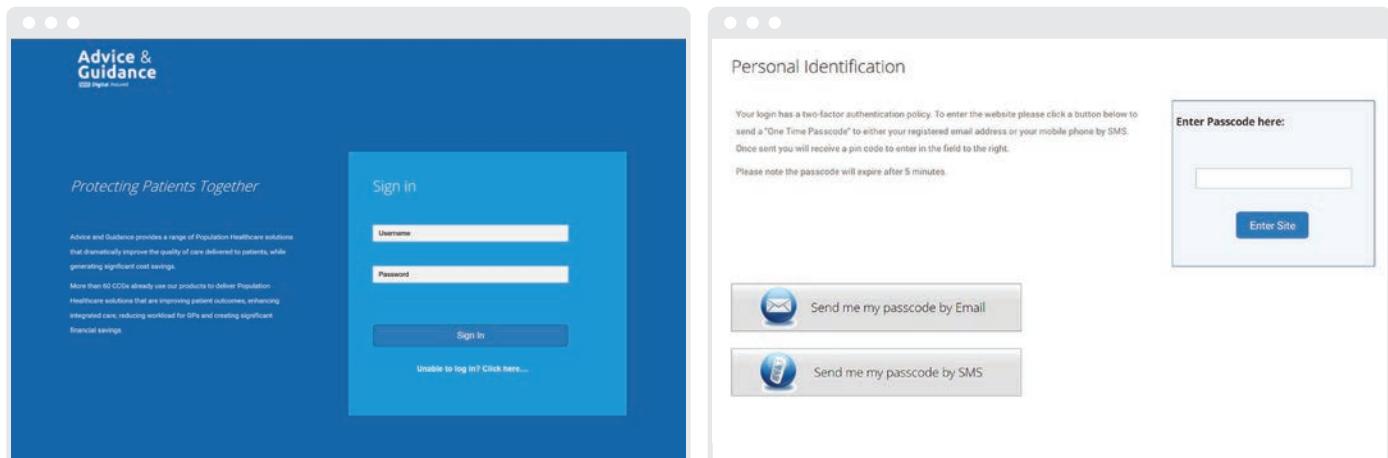

VALIDATION OF IMPROVED OUTCOMES

The Diabetes Complete interface allows your practice to evaluate the monitoring, treatment target attainment, prescribing analysis and use of secondary care services by your diabetes patients. Never has there been such a comprehensive validation tool available for GP Practices.

NHS Pathways

For PID Eclipse is accessed via <https://secure.nhspathways.org> when using HSCN/N3.
For non-PID Eclipse is accessed via www.nhspathways.org

LOGGING IN

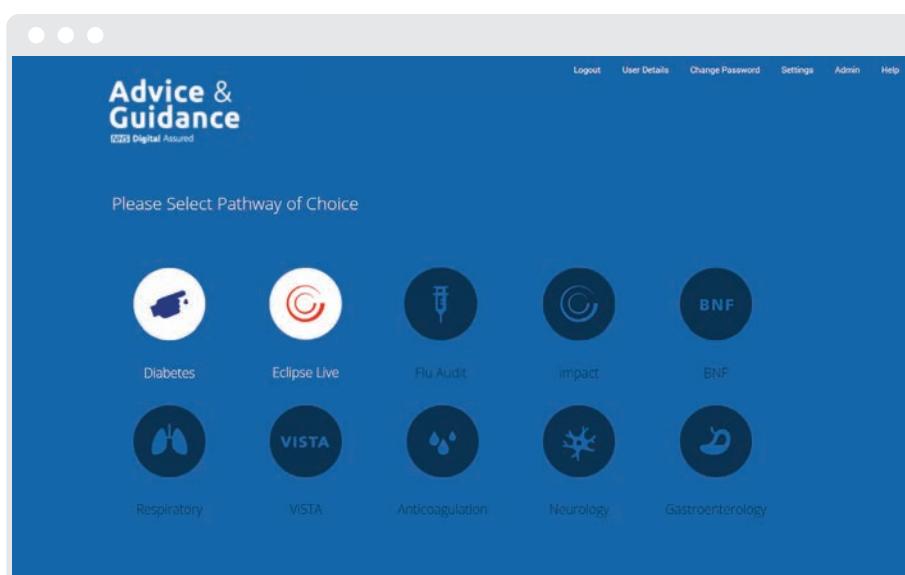

Log in with your username and password.

NHS Pathways is accessed through the secure Advice & Guidance (Eclipse Live) portal. In addition to being hosted on a secure ISO27001 server, two-factor authentication is required to log in. This simply involves entering an access code that is sent by SMS to your mobile or emailed to your NHS email address.

Please contact our support team if you require assistance - support@prescribingservices.org

THE HOME PAGE

Once logged in the home page will be shown.

Please select the **Diabetes** icon to access the Diabetes Complete interface.

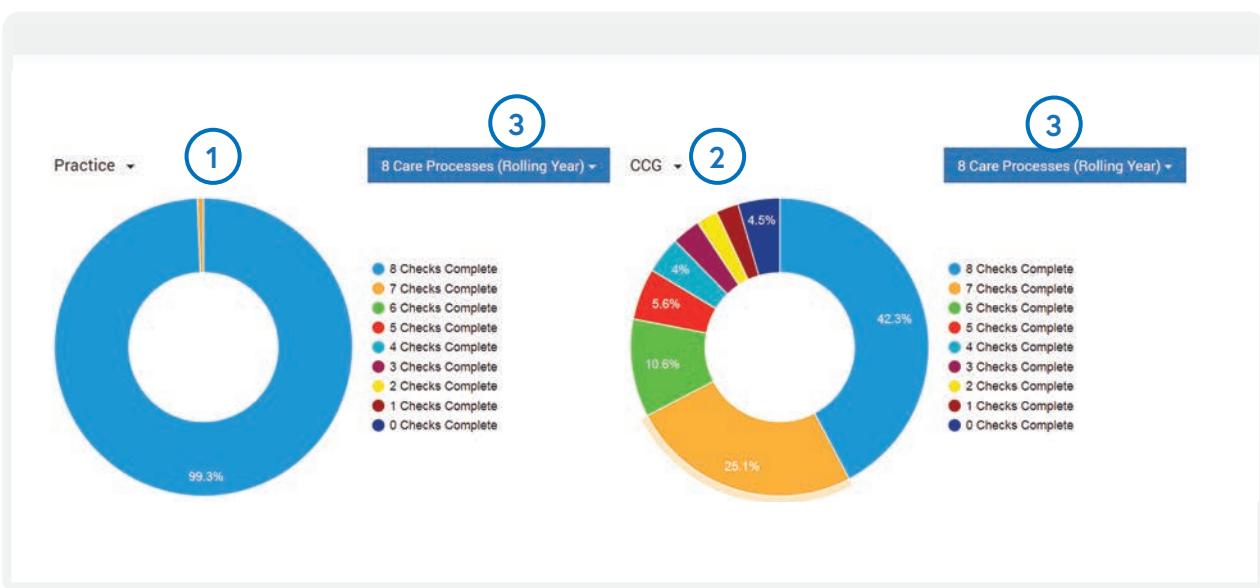

The Diabetes Complete interface contains the latest National Diabetes Audit criteria updated by your most recent extraction. It provides a comprehensive overview of all the statutory requirements and allows easy identification of at risk patients.

KEY AREAS

The screenshot shows a dashboard for 'All Diabetes' patients. At the top, there are navigation links: Home, Overview, My Patients, NHS Performance, Medications, and Action Plan. A blue header bar displays '2' alerts (4 red, 13 amber) and a search bar with a 'Find Patient' button. Below the header, a section for 'All Diabetes' shows the count '297 (8.3%) with Diabetes' with a green status indicator. A list of performance metrics follows:

- 94% with all 8 care processes completed in rolling 12M (Rank 1/20, green)
- 15% with all 8 care processes completed in current QOF Year (Rank 2/20, green)
- 65% in range for all 3 treatment standards (Rank 1/20, green)
- 814 / 2,376 (34.3%) Total Tests Completed in current QOF Year (Rank 1/20, green)

- 1 **All Diabetes:** Review different categories of diabetes (data will update accordingly).
- 2 **Alerts:** Clicking on the Alerts tab will give you an alert breakdown of all patients who have diabetes, but also includes non-diabetes related alerts.
- 3 Clicking on the red PDF icon produces a Monthly Diabetes Report on a PDF document. It is for last whole complete month.

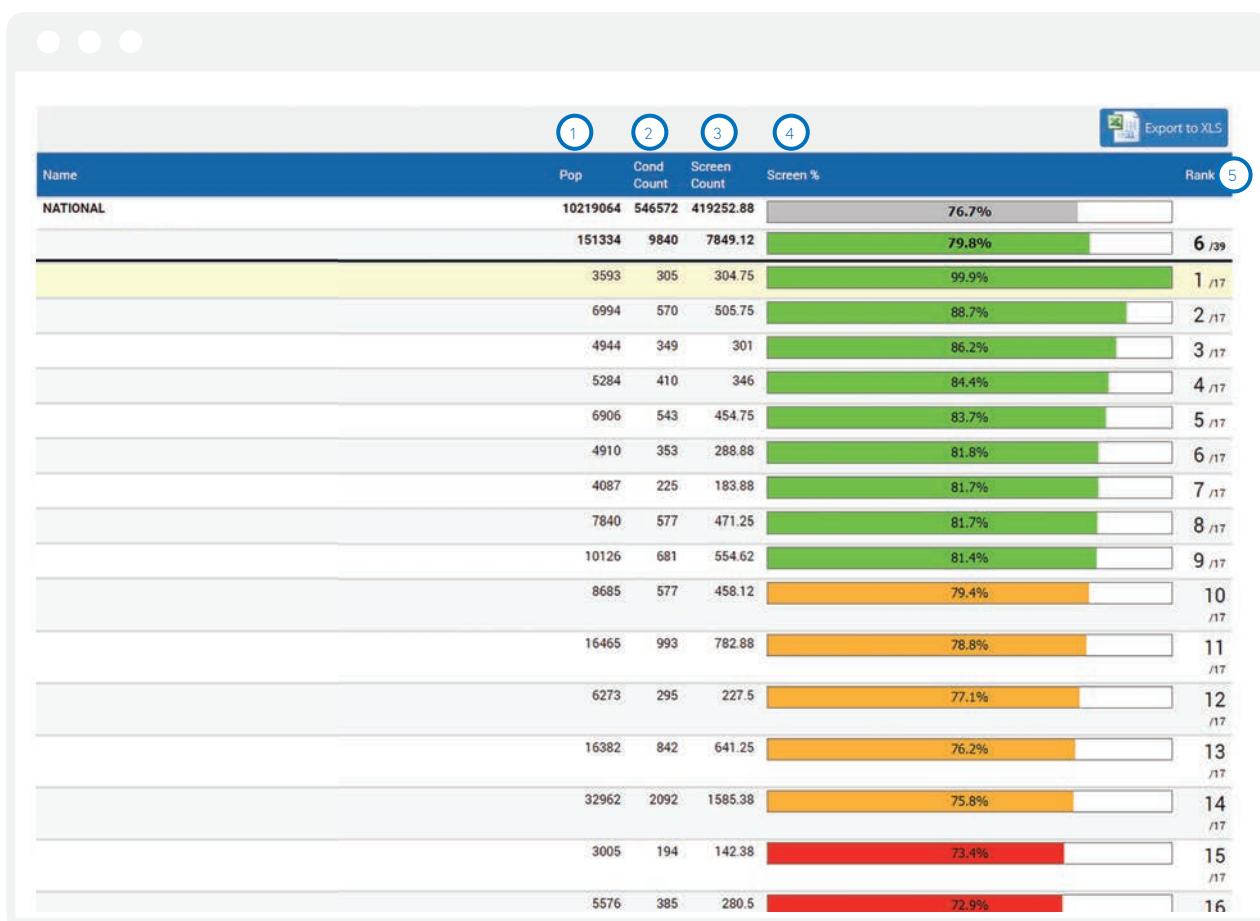

Pie charts:

- 1 Practice level - Compare your practice within your CCG or to the NDA (National Diabetes Audit).
- 2 CCG Level - View data on a national scale through to CCG level or select an individual practice within your CCG.
- 3 8 Care Processes - Review up to 5 years including the rolling year of the 8 Care Processes or 3 Treatment Standards.

Surgery Analysis of Patients with Care Processes Undertaken: Percentage of patients with diabetes having tests undertaken, based on the 8 care processes. (Can be viewed for the rolling 12 months or the current QOF year)

- 1 Pop - Population of Surgery.
- 2 Cond Count – Number of patients with condition.
- 3 Screen Count – Number of patients having tests for the condition.
- 4 Screen % - The % of screening tests completed on all patients with diabetes over the last audit year.
Note: This differs from the NDA data because it is a percentage of all individual tests and NDA only gives a percentage when all tests are complete.
- 5 Rank - Ranks the CCGs / PCNs / GP practices in order.

Information taken from Eclipse Live

The following thresholds apply:

- Blood pressure less than or equal to 140/80.

- Cholesterol of less than 5.0 mmol/l.

- HbA1c less than 7.5% (<59mmol/mol).

Monitoring Status: This shows total tests undertaken for the selected period.

Percentage graph for Patient Screening and Treatment Targets showing target met within CCG.

Graph ranking surgery analysis of patients having tests undertaken and in range for chosen criteria.

1

View patient Test and Target data

Data is colour coded:

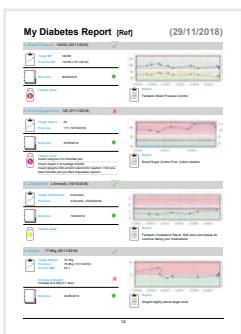

Green	In range
Blue	Slightly above target
Amber	Moderate concern
Red	Action required

This is where patient inertia is highlighted with the patients needing intervention listed in order of most needed first.

The 8 key care processes can be viewed quickly to identify patients who sit outside the defined thresholds.

Review individual patient data by clicking the magnifying glass icon  at the end of each row (Good for reviewing more than one patient at a time).

Generate a Diabetes Patient Report by clicking the book icon  at the end of each row.

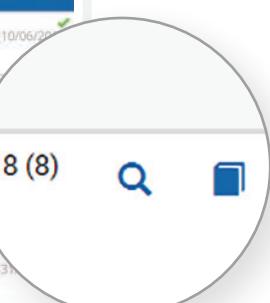

Each list of patients can be exported to Excel.

Review individual specific Diabetes patient data by clicking on the magnifying glass (patient SMURF, see pic below)

When accessing via <https://secure.nhspathways.org> the patients NHS number will be exported into the Excel document.

Education: Supplies data of patients listed by reference number according to date referred, completed or declined.

USING THE MENU BAR AT THE TOP OF THE PAGE

My Patients

- 1 **Select the required category you wish to view.** You can view a table of your patients within different categories e.g. Type 1 Diabetes, Type 2 Diabetes, and Priority Patients (interface is the same for every page). CCG parameters can be personalised to individual CCG requirements.
- 2 The information displayed in the table shows a list of patients with either basic information (picture 1) or a list of Treatment Inertia (picture 2) which also shows what medication they are taking. This can be used to highlight patients in an easy to view grid. When you hover over the tick or blue cross it will tell you the name of medication and date it was last issued.
- 3 You can also export the information into an Excel document. When accessing via <https://secure.nhspathways.org> the patients NHS number will be exported into the Excel document.

NHS Performance

This shows percentage graphs for the rolling year and audit year of the 8 care processes and ranks diabetes related admissions and prescribing summaries.

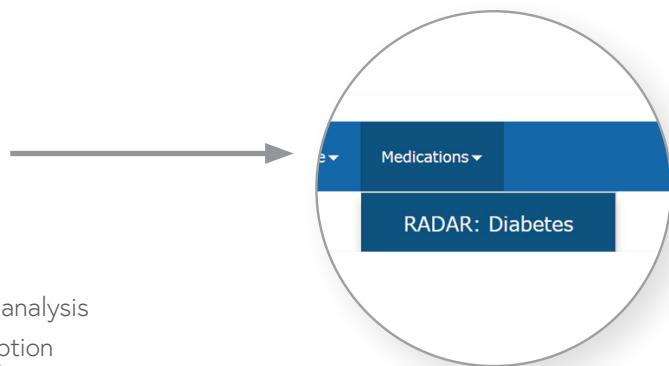

8 Care Processes & 3 Treatment Standards: Shows percentage graphs for the Rolling Year and Audit Year, (Picture 1: 8 Key Care processes).

PICTURE 1

Medications

Selecting the RADAR option will open a different interface within Eclipse Live (Please note that this may take some time).

Diabetes:

You can choose which data to review, the pie charts and trend analysis graph will update accordingly. There is also a CCG / Practice option where you can choose the data for each individual practice. (1)

The screenshot displays the RADAR interface for the Diabetes pathway. At the top, there are navigation links: Home, Overview, Categories, Analytics, and Search. The main content area is titled 'Pathway: Diabetes ↓' and includes the following sections:

- Breakdown by Cost [Aug 18]**: A donut chart showing the cost breakdown for Aug 18. The largest segment is Metformin at 52%.
- Breakdown by Packs [Aug 18]**: A donut chart showing the pack breakdown for Aug 18. The largest segment is Metformin at 27.7%.
- Chart: Overall Trend Analysis ↓**: A dual-axis chart showing Cost (left y-axis, £0 to £10,000) and Packs (right y-axis, 0 to 600) from Jun-17 to Aug-18. The chart shows a general upward trend in both cost and pack usage.
- Report [Nov 18]**: A table showing the number of patients for various diabetes categories. The table includes:

Category	Total Patients	Percentage
Diabetes	243	6%
Biguanides	242	9%
DPP4i	7	0%
Intermediate And Long-Acting	0	0%
Other Antidiabetics	0	0%
SGLT-2	0	0%
Short-Acting Insulins	0	0%
Sulfonylureas	0	0%
- Report [Aug 18]**: A table comparing National, Practice, and CCG data across four metrics: Pack Utilisation, Overall Cost, and Average Cost per Pack. The table includes:

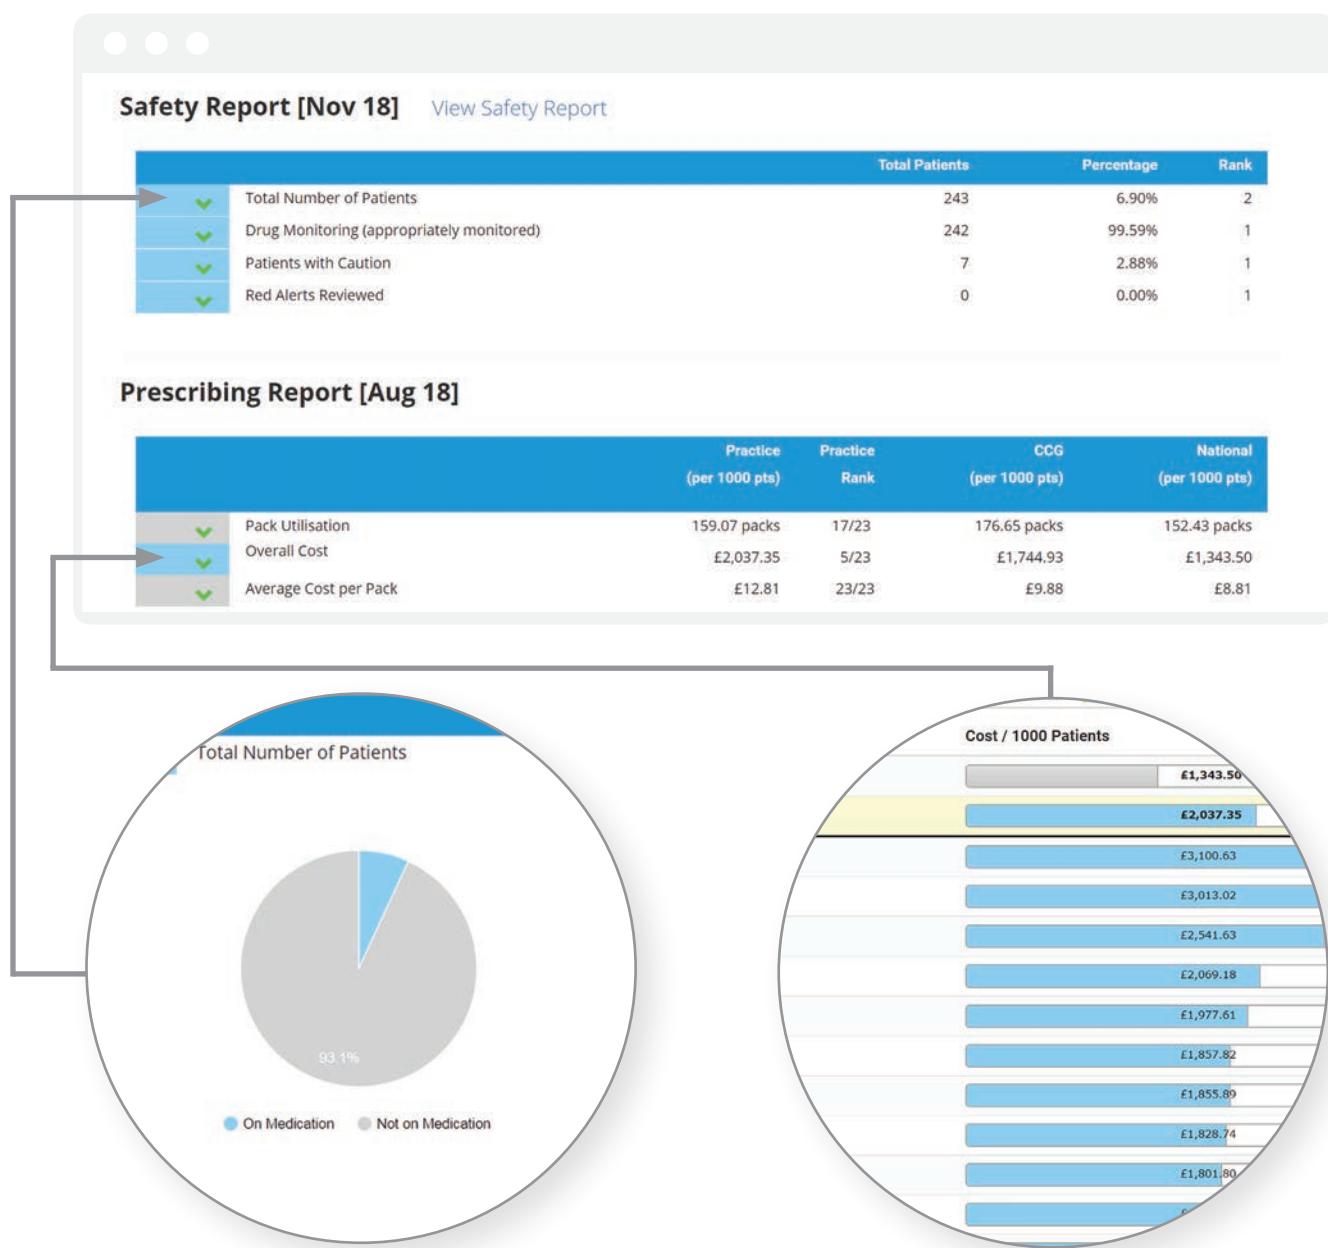

Organisation	Practice (per 1000 pts)	Practice Rank	CCG (per 1000 pts)	National (per 1000 pts)
National Average	159.07 packs	17/23	176.65 packs	152.43 packs
CCG	£2,037.35	5/23	£1,744.93	£1,343.50
Practice	£12.81	23/23	£9.88	£8.81
- Overall Trend Analysis ↓**: A bar chart comparing the overall trend analysis across National, Practice, and CCG levels.
- ORGANISATION COST/1000 PACKS/1000**: A table comparing the cost and pack utilization per 1000 patients for National Average, CCG, and Practice.
- Icons**: Icons for Safety Alerts, Usage Reports, Patients, Analysis, and Vista.

Prescribing data from ePACT

VISTA: This option is only available for those CCGs who are activated for VISTA.

Reports: You can view a 'Safety Report' for total number of patients on medication, drug monitoring, patients with caution and red alerts.

You can also expand each section for additional details such as national ranking comparison by clicking on the green arrow to the left of each item.

Reports: You can also view 'Prescribing Report' of pack utilisation, overall cost and average cost per pack.

ORGANISATION	COST/1000	PACKS/1000
National Average	£1,343.50	152.43
CCG	£1,744.93 (Rank: 195/202)	176.65 (Rank: 20/202)
Practice	£2,037.35 (Rank: 5/23)	159.07 (Rank: 17/23)

Performance Status: At the bottom of the page there are buttons for you to choose, including Safety Alerts, Usage Reports, Cost Effectiveness, Patients and Analysis.

Safety Alerts: This links to the weekly patients safety alerts that run within Eclipse Live. These are updated each week and allow patients to be reviewed.

Note, for patient safety, these should be reviewed every week as these are potentially your higher risk patients.

Haem >13	87%

Action Plan

Background

Best practice diabetes care is in large part driven by delivery of the Key Care Process and Treatment Standards. To support this within the VISTA Diabetes Pathway the Action Plan allows NHS organisations to rapidly identify, review and plan interventions related to patients with any out of range Treatment Targets or missing Key Care Processes.

The Action Plan highlights 'quick wins' based on number of interventions required and previous results/processes completed.

The screenshot shows a web-based application for managing diabetes patient data. At the top, a navigation bar includes links for Home, Overview, RightCare, My Patients, NHS Performance, Medications, and Action Plan. A status indicator shows 'Alerts: 1 red 30 amber'. Below the navigation is a summary table for 'Blood Pressure' with three rows of data. A circled '1' is next to the 'View' link for the last row. The table has columns for 'Total Patients', 'Total Patients needing tests', and '% Patients needing test'. The data shows 298 patients, 6 needing tests (2.01%), 2 patients out of range and not tested in the last 3 months (0.67%), and 15 patients out of range and tested in the last 3 months (5.03%). Below this are tables for 'Cholesterol', 'HbA1c', and 'Summary', each with three rows of data. The 'Summary' table includes a row for patients without all 8 key care processes completed (3.69%). At the bottom is a table for 'Quick Action Plans' with three rows: Phase 1 (0%), Phase 2 (0%), and Phase 3 (1.01%). Each row has a 'View' link.

Blood Pressure			
	Total Patients	Total Patients needing tests	% Patients needing test
Patients without test in current QOF Year	298	6	2.01%
Patient out of range and not tested in the last 3 months	298	2	0.67%
Patient out of range and tested in the last 3 months	298	15	5.03%

Cholesterol			
	Total Patients	Total Patients needing tests	% Patients needing test
Patients without test in current QOF Year	298	6	2.01%
Patient out of range and not tested in the last 3 months	298	15	5.03%
Patient out of range and tested in the last 3 months	298	34	11.41%

HbA1c			
	Total Patients	Total Patients needing tests	% Patients needing test
Patients without test in current QOF Year	298	6	2.01%
Patients out of range and not tested in the last 3 months	298	8	2.68%
Patients out of range and tested in the last 3 months	298	49	16.44%

Summary			
	Total Patients	Total Patients needing tests	% Patients needing test
Patients with 1 or more 3 Key Treatment Standards Out of Range or Not Tested	298	26	8.72%
Patients without All 8 Key Care Processes Completed	298	11	3.69%

Quick Action Plans			
	Total Patients	Total Patients needing tests	% Patients needing test
Phase 1: Patients for review to maximise 8 key processes and 3 treatment targets where 1 test is required and previous test was normal	298	0	0%
Phase 2: Patients for review to maximise 8 key processes and 3 treatment targets where 2 tests are required and previous tests were normal	298	0	0%
Phase 3: Patients for review to maximise 8 key processes and 3	298	3	1.01%

Summary of patients tested for their 3 key treatment standards and 8 key care processes and quick action plans associated with these.

HOW TO SET UP USERS FOR ECLIPSE

ICB level log in requests have to be authorised by the Head of Medicines Management and should be sent to support@prescribingservices.org

Practice level log in requests have to be authorised by either the Practice Manager / Lead GP or Primary Contact listed on the original sign up form and should be sent to support@prescribingservices.org for Information Governance purposes.

All log in requests require the following:

- Name
- Job Role
- NHS Email
- Mobile Number (optional)
- ICB
- Practice National Code
- Practice Name

Once received these requests will be actioned, details sent to users directly and you will be updated.
