## **Polite reminder:**

- When selecting advice and refer services, ensure you select the request type 'advice' before making a referral. This will ensure you see the correct services available in your area.
- Before submitting the request, please give permission to the provider to convert to a referral where appropriate.
- If you need any help, including guidance on what to do if an A&G request has not been answered, please refer to the [A&G handbook](#).
- Please respond to any queries from secondary care promptly for the patient's benefit and remember to close the request afterwards.
- Please ensure A&R is being used for clinical queries and referrals, not for **admin or pathology queries**.
