

Join the GP PSIRF Programme

Shape Patient Safety in General Practice

The Health Innovation Network (HIN) South London is now inviting registrations for its General Practice Patient Safety Incident Response Framework (GP PSIRF) Programme. This is a unique opportunity to get ahead of upcoming changes, help shape how PSIRF works in general practice, and strengthen patient safety in your organisation – all with fully funded expert support.

By joining now, you will

- ✓ Be ahead of future national requirements
- ✓ Build a more open, proactive safety culture
- ✓ Gain practical tools to reduce avoidable harm and improve outcomes
- ✓ Help shape future national rollout for general practice

Who should join?

We welcome participants from across primary care anywhere in England, including:

- GP practices
- Primary Care Networks (PCNs)
- GP Federations
- Integrated Care Boards (ICBs)

What the programme offers

This free programme (July 2026 – March 2027) provides hands-on support to help you embed PSIRF and drive meaningful improvement in your practice or network.

You'll receive:

- Interactive learning sessions - build practical skills to improve patient safety, staff experience, and patient outcomes
- Peer learning and networking - learn from real examples and connect with colleagues across England
- Tailored expert support - work with improvement specialists to strengthen your local systems
- Insights from national experts - hear directly from NHS and regulatory leaders
- A chance to influence the future - share feedback to shape how PSIRF is implemented across general practice nationally

Be part of the change – sign up to take part today

This is more than a programme – it's a chance to lead the transformation of patient safety in general practice.

Join a growing community who are creating safer, more transparent, and learning-focused care systems. Registering by the 7th July 2026 will give you the greatest level of support.
