Mile End Community Diagnostic Centre (CDC)
Mile End Hospital
Bancroft Road
London

8th June 2026

Dear Colleague,

RE: Cardiac Diagnostic Services at Mile End CDC

We are pleased to inform you that the Mile End Community Diagnostic Centre (CDC) will be accepting referrals for the following cardiac diagnostic services from Monday 1 June 2026:

- Electrocardiogram (ECG)
- Ambulatory 24-hour ECG monitor
- Echocardiography.

This service is part of our ongoing efforts to improve access to timely and high-quality diagnostic testing within the community, supporting earlier diagnosis and improved patient outcomes.

Referral Process

- Referrals for these services can be made directly via the NHS Electronic Referral System (eRS) from 1 June 2026.
 - Cardiology - Ambulatory 12 Lead ECG Test - MEH - Barts Health Trust - R1H
 - Cardiology - Ambulatory Diagnostics Test 24Hr Tape - RAS - MEH - Barts Health NHS-Trust - R1H
 - Cardiology ECHO - Diagnostics Test RAS - CDC - MEH - Barts Health NHS Trust - R1H—Trust - R1H
- Please find the referral form attached in a separate document. We aim to upload this document to GP clinical systems, but there are some minor delays.
- All referrals will be triaged against national guidelines and assessed according to clinical need or urgency.

Benefits of the service:

- Quicker, faster access for patients to diagnostic tests, closer to home
- Signposting and future entry to symptoms-based pathways.

You will remain involved in your patients' care throughout the pathway and will receive timely communication regarding test results and recommended next steps.

We look forward to working collaboratively with you to deliver this enhanced diagnostic service for our population.

If you require any further information or support, please do not hesitate to contact the CDC team.

Yours sincerely,
Mile End CDC Cardiac Clinical Team
Barts Health NHS Trust
