

GP Practice Capacity in Newham

You may be aware that the ICB is currently procuring a new North East London-wide Homeless Health APMS service, which is due to commence in April 2027.

In preparation for the mobilisation of the new service, practices that currently provide services to homeless patients are being asked to review their registered patient lists. The purpose of this review is to identify patients who are no longer homeless and who may be more appropriately registered with a local NHS GP practice.

This survey aims to understand GP providers' current capacity and capability to register new patients.

Please work through the following below and return to the team on nelondonicb.nel-primarycare@nhs.net by **1 September 2026**.

The analysis of the feedback will provide Commissioners with a better understanding of any concerns or issues within the Newham area.

Place/Borough:	
Practice:	
List size:	
WTE GPs	
WTE PN/NP	
No. of Clinical rooms	

1. (a) What is the maximum number of patients you would be able to register within a 3 – 6 month period?

(b) What additional clinical and administrative resources, **if any**, would the practice have to input?

2. Will additional space/rooms be required to accommodate the growth in list size?
Please give details of current usage:

3. Please provide information on any practice plans for service development or quality improvement:

Please use this space to provide additional information and comments you might wish to make:
